This manual is developed for use within advanced first aid, CPR, and AED training courses offered through the Emergency Care & Safety Institute. Based on the 2010 International Consensus Guidelines for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiac Care (ECC), Advanced First Aid, CPR, and AED, Sixth Edition is ideal for use within college-level courses designed to certify individuals in first aid, CPR, and AED. More than a stand-alone text, this student manual is the center of an integrated teaching and learning system that offers many resources to better support instructors and prepare students. This manual includes: Coverage of the 2010 CPR and ECC Guidelines: Clear, concise direction on how to perform CPR and use an AED during an emergency. Current information on injuries and illnesses: Core information for first aiders presented in a clear and straightforward format. Skill Drills: Offer step-by-step explanations and visual summaries of important skills. Emergency Care Wrap-Up Tables: Provide a concise summary of what signs first aiders should look for and what treatment steps they should take. About the Emergency Care & Safety Institute The Emergency Care & Safety Institute (ECSI) is an internationally renowned organization that provides training and certifications that meet job-related requirements as defined by regulatory authorities such as OSHA, The Joint Commission, and state offices of EMS, Education, Transportation, and Health. ECSI's courses are delivered throughout a range of industries and markets worldwide, including colleges and universities, business and industry, government, public safety agencies, hospitals, private training companies, and secondary school systems. ECSI offers world-class training solutions in the areas of: Advanced Cardiac Life Support Automated External Defibrillation Babysitter Safety Bloodborne and Airborne Pathogens CPR (Layperson and Health Care levels) Driver Safety Emergency Medical Responder (formerly known as First Responder) First Aid (Standard, Advanced, Pediatric, Wilderness, and other levels) Oxygen Administration

The Red Cross Bulletin

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve

retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

What Was Ellis Island?

Helping Today's Canadian Students Focus On Health! Today's media-oriented students are aware of the critical health issues of the new millennium. They hear about environmental issues, substance abuse, sexually transmitted diseases, fitness, and nutrition virtually every day. The value of the personal health course is its potential to expand students' knowledge of these and other health topics. Students will then be able to examine their attitudes toward health issues and modify their behaviour to improve their health and perhaps even prevent or delay the onset of certain health conditions. Focus on Health, First Canadian Edition, has the currency, coverage, and pedagogy aimed at helping students to think critically about
