The first biography of the enigmatic dadaist known as "the Baroness"--Elsa von Freytag-Loringhoven. Elsa von Freytag-Loringhoven (1874-1927) is considered by many to be the first American dadaist as well as the mother of dada. An innovator in poetic form and an early creator of junk sculpture, "the Baroness" was best known for her sexually charged, often controversial performances. Some thought her merely crazed, others thought her a genius. The editor Margaret Anderson called her "perhaps the only figure of our generation who deserves the epithet extraordinary." Yet despite her great notoriety and influence, until recently her story and work have been little known outside the circle of modernist scholars. In *Baroness Elsa*, Irene Gammel traces the extraordinary life and work of this daring woman, viewing her in the context of female dada and the historical battles fought by women in the early twentieth century. Striding through the streets of Berlin, Munich, New York, and Paris wearing such adornments as a tomato-soup can bra, teaspoon earrings, and black lipstick, the Baroness erased the boundaries between life and art, between the everyday and the outrageous, between the creative and the dangerous. Her art objects were precursors to dada objects of the teens and twenties, her sound and visual poetry were far more daring than those of the

male modernists of her time, and her performances prefigured feminist body art and performance art by nearly half a century.

### **Code Connected Volume 1**

"Amid gloomy forecasts of the decline of the humanities and the death of poetry, Angus Fletcher, a wise and dedicated literary voice, sounds a note of powerful, tempered optimism. He lays out a fresh approach to American poetry at large, the first in several decades, expounding a defense of the art that will resonate well into the new century. Breaking with the tired habit of treating American poets as the happy or rebellious children of European romanticism, Fletcher uncovers a distinct lineage for American poetry. His point of departure is the fascinating English writer, John Clare; he then centers on the radically American vision expressed by Emerson and Walt Whitman. With Whitman this book insists that ""the whole theory and nature of poetry"" needs inspiration from science if it is to achieve a truly democratic vista. Drawing variously on Complexity Theory and on fundamentals of art and grammar, Fletcher argues that our finest poetry is nature-based, environmentally shaped, and descriptive in aim, enabling poets like John Ashbery and other contemporaries to discover a mysterious pragmatism. Intense, resonant, and deeply literary, this account of an American poetics shows how today's consumerist and conformist culture subverts the imagination of a free people. While centering on American vision, the argument extends our horizon, striking a blow against all economically sanctioned attacks upon the finer, stronger human capacities. Poetry, the author maintains, is central to any coherent vision of life. "

### **Driven to Distraction**

Incontinence affects four out of 10 women, about one out of 10 men, and about 17% of children below age 15. The most common reason for admitting a family member to a nursing home is the family's inability to cope with incontinence. It is estimated that in the US incontinence costs 26 billion dollars a year. While it is common to exercise many parts of the body to stay fit, very little attention is paid to exercising the pelvic floor. Many exercises exist for the general fitness of the body, strengthening of the arms and legs and the abdominal and back muscles. Finding fun exercises for the pelvic floor involves searching through a great deal of literature; finding exercises suitable for men, women, and children that are fun and effective appears to be impossible. This book should provide therapists with treatment ideas and encourage patients to ask for help. It focuses on exercises and discusses other treatment options.

### **This Compost**

Poetry, for Jed Rasula, bears traces of our entanglement with our surroundings, and these traces

define a collective voice in modern poetry independent of the more specific influences and backgrounds of the poets themselves. In *This Compost Rasula* surveys both the convictions asserted by American poets and the poetics they develop in their craft, all with an eye toward an emerging ecological worldview. *Rasula* begins by examining poets associated with Black Mountain College in the 1950s--Charles Olson, Robert Creeley, and Robert Duncan--and their successors. But *This Compost* extends to include earlier poets like Robinson Jeffers, Ezra Pound, Louis Zukofsky, Kenneth Rexroth, and Muriel Rukeyser, as well as Clayton Eshleman, Gary Snyder, Michael McClure, and other contemporary poets. Walt Whitman and Emily Dickinson also make appearances. *Rasula* draws this diverse group of poets together, uncovering how the past is a "compost" fertilizing the present. He looks at the heritage of ancient lore and the legacy of modern history and colonial violence as factors contributing to ecological imperatives in modern poetry. *This Compost* restores the dialogue between poetic language and the geophysical, biological realm of nature that so much postmodern discourse has sought to silence. It is a fully developed, carefully argued book that deals with an underrepresented element in modern American culture, where the natural world and those who write about it have been greatly neglected in contemporary literary history and theory.

### **The Material of Poetry**

The Ecology of Modernism explores the unexpected absence of an environmental ethic in American modernist and avant-garde poetics, given its keen concern with an environmental aesthetic, and explains why American modernism was never green. Examining the relationships of key modernist writers, poets, and musicians to nature, industrial development, and pollution, Joshua Schuster posits that the curious failure of modernist poets to develop an environmental ethic was a deliberate choice and not an inadvertent omission.

## **Basic Technical Mathematics**

Although engineers receive an outstanding technical education, their success in today's organization demands knowledge of how to put that education to work. The Management Survival Manual for Engineers provides this information, creating the bridge between the world of science and the working organization. The text discusses the management of technology within the organization, the management of the engineering department, and the management of engineering projects through technical approaches and personnel aspects. The Management Survival Manual for Engineers introduces the engineer to basic

management of engineering, encouraging essential leadership and managerial philosophies. The book acts as a primary resource for engineers moving into managerial areas as opposed to technological ones. It addresses a multitude of topics, enabling the reader to grasp general concepts before addressing more specific concepts. Topics include: Examining the inter-organizational behavior, procedures, and policies required to work in formal organizations. Identifying the required knowledge of leadership Outlining the principles for effective communication skills Determining the responsibilities of the organization and engineering manager for preparing the new engineer entering the organization Introducing how engineering functions in the organization Forming a basic understanding for project management Describing the transition from new engineer to supervisor The Management Survival Manual for Engineers emphasizes an understanding of people, the organization, and management as opposed to technology - serving engineers entering the engineering field as well as those engineers moving into project management for the first time.

The affective domain and the emotional factors which influence language learning have been of interest in the field of language teaching for a number of years. By proposing a holistic approach to the learning process, this volume takes the position that the language learning experience will be much more effective when both affect and cognition are considered. The eighteen chapters discuss issues such as memory, anxiety, self-esteem, facilitation, autonomy, classroom activities, and assessment from the perspective of affect. *Affect in Language Learning* will be of interest to teachers-in-preparation, teachers, teacher educators, curriculum designers, programme administrators and researchers and to those second language teaching professionals who wish to improve language teaching through a greater awareness of the role affect plays.

Poetry is philosophically interesting, writes Gerald L. Bruns, "when it is innovative not just in its practices, but, before everything else, in its poetics (that is, in its concepts or theories of itself)." In *The Material of Poetry*, Bruns considers the possibility that anything, under certain conditions, may be made to count as a poem. By spelling out such enabling conditions he gives us an engaging overview of some of the kinds of contemporary poetry that challenge our notions of what language is: sound poetry, visual or concrete poetry, and "found" poetry. Poetry's sense and meaning can hide in the spaces in which it is written and read, says Bruns, and so he urges us to become anthropologists, to go afield in poetry's social, historical, and cultural settings. From that perspective, Bruns draws on works by such varied poets as Gertrude Stein, Ezra Pound, Steve McCaffery, and Francis Ponge to argue for three seemingly competing points. First, poetry is made of language but is not a use of it. That is, poetry is made of words but not of what we use words to produce: concepts, narratives, expressions of feeling, and so on. Second, as the nine sound poems on the CD included with the book demonstrate, poetry is not necessarily made of words but is rooted in, and in fact already fully formed by, sounds the human body can produce. Finally, poetry belongs to the world alongside ordinary things; it cannot be confined to some aesthetic, neutral, or disengaged dimension of human culture. Poetry

without frontiers, unmoored from expectations, and sometimes even written in imaginary languages: Bruns shows us why, for the sake of all poetry, we should embrace its anarchic, vitalizing ways.

This revised edition of Taylor's classic work on the internal-combustion engine incorporates changes and additions in engine design and control that have been brought on by the world petroleum crisis, the subsequent emphasis on fuel economy, and the legal restraints on air pollution. The fundamentals and the topical organization, however, remain the same. The

analytic rather than merely descriptive treatment of actual engine cycles, the exhaustive studies of air capacity, heat flow, friction, and the effects of cylinder size, and the emphasis on application have been preserved. These are the basic qualities that have made Taylor's work indispensable to more than one generation of engineers and designers of internal-combustion engines, as well as to teachers and graduate students in the fields of power, internal-combustion engineering, and general machine design. Charles Fayette Taylor is Professor of Automotive Engineering Emeritus at MIT. He directed the Sloan Automotive Laboratories at MIT from 1926 to 1960

### **A Sense of Things**

In May 1906, the Atlantic Monthly commented that Americans live not merely in an age of things, but under the tyranny of them, and that in our relentless effort to sell, purchase, and accumulate things, we do not possess them as much as they possess us. For Bill Brown, the tale of that possession is something stranger than the history of a culture of consumption. It is the story of Americans using things to think about themselves. Brown's captivating new study explores the roots of modern America's fascination with things and the problem that objects posed for American literature at the turn of the century. This was an era when the invention, production, distribution, and consumption of things suddenly came to define a national culture. Brown shows how crucial novels of the time made things not a solution to problems, but problems in their own right. Writers such as Mark Twain, Frank Norris, Sarah Orne Jewett, and Henry James ask why and how we use objects to make meaning, to make or remake ourselves, to organize our anxieties and affections, to sublimate our fears, and to shape our wildest dreams. Offering a remarkably new way to think about materialism, *A Sense of Things* will be essential reading for anyone

interested in American literature and culture.

### **The Ecology of Modernism**

The first major collection of poetry written in English by the flabbergasting and flamboyant Baroness Elsa, “the first American Dada.” As a neurasthenic, kleptomaniac, man-chasing proto-punk poet and artist, the Baroness Elsa von Freytag-Loringhoven left in her wake a ripple that is becoming a rip—one hundred years after she exploded onto the New York art scene. As an agent provocateur within New York’s modernist revolution, “the first American Dada” not only dressed and behaved with purposeful outrageousness, but she set an example that went well beyond the eccentric divas of the twenty-first century, including her conceptual descendant, Lady Gaga. Her delirious verse flabbergasted New Yorkers as much as her flamboyant persona. As a poet, she was profane and playfully obscene, imagining a farting God, and transforming her contemporary Marcel Duchamp into M’ars (my arse). With its ragged edges and atonal rhythms, her poetry echoes the noise of the metropolis itself. Her love poetry muses graphically on ejaculation, orgasm, and oral sex. When she tired of existing words, she created new ones: “phalluspistol,” “spinsterlollipop,” “kissambushed.” The Baroness’s rebellious, highly sexed howls prefigured the Beats; her intensity and psychological complexity anticipates the poetic utterances of Anne Sexton and Sylvia Plath. Published

more than a century after her arrival in New York, *Body Sweats* is the first major collection of Elsa von Freytag-Loringhoven's poems in English. The Baroness's biographer Irene Gammel and coeditor Suzanne Zelazo have assembled 150 poems, most of them never before published. Many of the poems are themselves art objects, decorated in red and green ink, adorned with sketches and diagrams, presented with the same visceral immediacy they had when they were composed.

"Even connecting a few programs across a few sockets is plain nasty when you start to handle real life situations. Trillions? The cost would be unimaginable. Connecting computers is so difficult that software and services to do this is a multi-billion dollar business. So today we're still connecting applications using raw UDP and TCP, proprietary protocols, HTTP, Websockets. It remains painful, slow, hard to scale, and essentially centralized. To fix the world, we needed to do two things. One, to solve the general problem of "how to connect any code to any code, anywhere." Two, to wrap that up in the simplest possible building blocks that people could understand and use easily. It sounds ridiculously simple. And maybe it is. That's kind of the whole point." If you are a programmer and you aim to build large systems, in any language, then *Code Connected* is essential reading. *Code Connected Volume 1* takes you through learning ZeroMQ, step-by-step, with over 80 examples. You will learn the basics, the API, the

different socket types and how they work, reliability, and a host of patterns you can use in your applications. This is the Professional Edition for C/C++.

### **31 Days Before Your Ccna Routing and Switching Exam**

This original study re-evaluates central texts of the modernist canon - Eliot's early poetry including *The Waste Land*, Joyce's *Ulysses* and Proust's *Remembrance of Things Past* - by examining sexual energies and identifications in them that are typically regarded as perverse. According to modern cultural discourses and psychosexual categorizations, these deviant desires and identifications feminize men, or tend to render them homosexual. Colleen Lamos's analysis of the operations of gender and sexuality in these texts reveals conflicts, concerning the definition of masculine heterosexuality, which cut across the aesthetics of modernism. She argues that canonical male modernism, far from being a monolithic entity with a coherently conservative political agenda, is in fact the site of errant impulses and unresolved struggles. What emerges is a reconsideration of modernist literature as a whole, and a recognition of the heterogeneous forces which formed and deformed modernism.
