History of Modern India presents an authoritative overview of the history of what was known as British India. The text is largely based on the author's research on nationalism and colonialism in India and also draws from the works of eminent historians of the period. Challenging and revising colonial and nationalist interpretations of history, this book moves away from a largely political narrative to a social, economic and religious history of modern India. It explains how conditions in India during the eighteenth century helped the British East India Company establish its rule in India. It also gives us important insights into the primary aim of

colonial rule which was the economic exploitation of India through trade and investment. The topics are arranged thematically in order to showcase the various forces that went into the making of independent India. However, in the entire arrangement of themes, the chronology of the period is enmeshed innovatively with the various forces that evolved both as a cause and effect of British imperialist rule of the subcontinent. The book also provides a detailed account of the nationalist movement and introduces us to the contributions of different individuals who were behind the nationalist movement. A comprehensive textbook for students of history and interested readers, History of Modern India is essential reading for a broad based understanding of the making of modern India.

From the early Renaissance through Baroque and Romanticism to Cubism, Surrealism, and Pop, these canonical works of Western Art span eight centuries and a vast range of subjects. Here are the sacred and the scandalous, the minimalist and the opulent, the groundbreaking and the conventional. There are paintings that captured the feeling of an era and those that signaled the beginning of a new one. Works of art that were immediately recognised for their genius, and

others that were at first met with resistance. All have stood the test of time and in their own ways contribute to the dialectic on what makes a painting great, how notions of art have changed, to what degree art reflects reality, and to what degree it alters it. Brought together, these great works illuminate the changing preoccupations and insights of our ancestors, and give us pause to consider which paintings from our own era will ultimately join the canon.

The Non-Aligned Movement (NAM) is the largest and most diverse political grouping of states engaged on issues related to nuclear nonproliferation and disarmament. Drawing on the authors first-hand experiences as members of NAM observer-state delegations in NPT and IAEA negotiations, as well as the findings of a larger CNS research project on NAM nuclear politics, the book will provide important new insights about how a small subset of NAM states has tended to dominate NAM politics and have promoted policies that are often at odds with those advanced by Western states on issues such as nuclear terrorism, IAEA safeguards, nuclear export controls, multinational fuel arrangements, proliferation in the Middle East, NPT, and nuclear arms control and disarmament. Based on an analysis of NAM perspectives, politics, and priorities, the book will provide practical recommendations for engaging NAM members in a more constructive fashion on issues related to nuclear nonproliferation, disarmament, peaceful use, and counter-nuclear terrorism. Particular attention will be given to problems likely to be encountered when Iran assumes the chairmanship of NAM in 2012 and how these difficulties can best be mitigated in the lead up to the next NPT Review
