Nature Word

Reproduction of the original: A Trooper Galahad by Captain Charles King

Sacred Books of the East: Sacred laws of the Aryas, pt. 1

A single baby, born to save a world. Two ancient prophecies, both foretelling the extinction of a race. Two sides racing to their appointment with destiny. A leader of men, determined to outwit the foretelling of his doom, leads his people in a sickening massacre to secure the continuation of his race. A single man, troubled with nightmares and voices in dreams, worries for his sanity as his life crumbles around him. Alone and friendless, Vincent escapes to isolated freedom, the loneliness forcing him to succumb to the terrifying nightmares and finally, to listen

to the voices in the dreams. Many worlds away across the aching void, Farra listens to the voices in her own dreams, and embarks upon a perilous journey to bring truth and justice to one troubled soul struggling to find a purpose. The child that is now a man must face his nemesis and end the tide of evil that laid waste his world as he took his first breath. The voices in the dreams lead them on a journey through space and time, from world to world in a desperate struggle for truth, justice, life.

Esoteric Egypt

Contrary to the view that relations between religion and the sciences in the sixteenth century were ridden with bitter conflict, the studies here indicate the ways in which religious conviction Jewish, Roman Catholic or Protestant and the development of the natural sciences and medicine influenced each other.

Sacred Books of the East: The laws of Manu

The Sacred Books of the East: The sacred laws of the Aryas (pt.1), translated by Georg Bühler

The first English translation and examination of secret Japanese writings dating from the paleolithic to classical eras • Examines four suppressed and secret texts to discover the deeper truths beneath Japanese mythology • Introduces evidence of ancient civilizations in Japan, the sacred geometry of primitive times, and claims of a non-Earthly origin of the Emperors • Explores how these texts convey the sacred spiritual science of Japan's Golden Age with parallels in ancient India, Europe, and Egypt In Japan there are roughly two dozen secret manuscripts originally dating back to the paleolithic era, the age of heroes and gods, that have been handed down by the ruling families for centuries. Rejected by orthodox Japanese scholars and never before translated into English, these documents speak of primeval alphabets, lost languages, forgotten technologies, and the sacred spiritual science. Some even refer to UFOs, Atlantis, and Jesus coming to Japan. Translating directly from the original Japanese, Avery Morrow explores four of these manuscripts in full as well as reviewing the key stories of the other Golden Age chronicles. In the Kujiki manuscript Morrow uncovers the secret symbolism of a Buddhist saint and the origin of a modern prophecy of apocalypse. In the Hotsuma Tsutaye manuscript he reveals the exploits of a noble tribe who defeated a million-strong army without violence. In the Takenouchi Documents he shows us how the first Japanese emperor came from another world and ruled at a time when Atlantis and Mu still existed. And in the Katakamuna Documents the author unveils the sacred geometries of the universe from the symbolic songs of the 10,000-year-old Ashiya tribe. He also discusses the lost scripts known as the Kamiyo Moji and

the magic spiritual science that underlies all of these texts, which enabled initiates to ascend to higher emotional states and increase their life force. Taking a spiritual approach à la Julius Evola to these “parahistorical” chronicles, Morrow shows how they access a higher order of knowledge and demonstrate direct parallels to many ancient texts of India, Europe, and Egypt.

Symbol and the Symbolic

Creating the Soul Body

The School of the Sacred Science

The meaning of a science rooted in the sacred, its contrast to modern science and its pertinence to us today.

The Sacred Science of Ancient Japan

Christian Schools and Scholars

Lucifer

Science and religion are often viewed as dichotomies. But although our contemporary society is often perceived as a rationalization process, we still need broad, metaphysical beliefs outside of what can be proven empirically. Rituals and symbols remain at the core of modern life. Do our concepts of science and religion require revitalization? Can science itself be considered a religion, a belief, or an ideology? Science's authority and prestige allows for little in the way of alternate approaches not founded in empirical science. It is not unusual to believe that technology and science will solve the world's fundamental problems. Has truth been colonized by science? Have scientific disciplines become so specialized and "operationally closed" that they have constructed barriers to other disciplines as well as the general public? The writers of this book set out to investigate whether the symbols of academia may in some cases take on a quality of sacrality, whether the rule of experts can be said to have the character of a "priesthood of knowledge", whether religion has a place in scientific contexts, and a selection of other questions concerning science and its relations to religious belief.

A Dictionary of the Hindee Language

The Universal Kabbalah

Symbolism is the intuitive means of overcoming the limitations of reason. Here Schwaller explains how true progress in human thought can be made only if we call upon the "symbolizing" faculty of intelligence, developed and refined in the temple culture of ancient Egypt and reflected in its hieroglyphs.

Symbols of Sacred Science

This is a translation of one of Guenon's most significant works. It contains chapters with titles such as: The Science of Letters; Symbolic Weapons; and The Symbolism of the Zodiac among the Pythagoreans. The work aims to give new meaning to so many of the objects involved in daily life.

The Sacred Books of the East

A Concise View of the Succession of Sacred Literature

Keys to Sacred Science is written in a unique style, which may be unfamiliar to many readers. In this book the author introduces knowledge traditions in Islam, in particular focusing on one of the key sacred sciences, mastered by a select few, namely the science of numerology. The first part of the book describes how the path to acquiring sacred knowledge is unlike the contemporary approach to learning. The author makes reference to the account in the Quran of how Allāh bestowed total knowledge upon Adam, and the consequent significance for humankind, then the account of the quest for sacred knowledge by Moses, and his encounter with al-Khiḍr, the Wise. Numerology plays a key role in interpreting sacred texts, as in the Arabic language each letter has a numerical equivalent, according to the Abjad system. The author uses this approach to explain these Quranic passages, and sacred words and phrases, demonstrating meanings which lie hidden beneath the surface. He then applies the science of numerology to elucidate the form of the canonical prayer, one of the pillars of Islam. Making use of traditional tools of sacred science, such as the 'magic square', or Wafaq, and the Tetraktys, he provides remarkable demonstrations of the geometric and numerological structure manifested in the sacred rites, and he shows how each movement and detail related to the prayer is designed with perfect precision. Understanding more about the divine wisdom contained within these acts of worship, and how they are established in harmony within the universal system that underlies all creation, will not only serve to increase the faith of the believer, it

will open the reader's eyes to new dimensions, which were traditionally the privilege of only a select few.

Fundamental Symbols

The theme of Nature Word is the intelligence of the heart, the innate, functional consciousness, or way of thinking, that is in harmony with nature and able to understand life and living things.

The Eclectic Magazine of Foreign Literature, Science, and Art

The idea of aliens and UFOs has always played a crucial role in human history. Regardless of the ridicule this mind-set inspires in skeptics, the intense speculation and debate on this topic continues to intrigue around the world. Hundreds have shared detailed personal experiences of contact with these beings or crafts, recounting a wide variety of alien interaction with our world and its peoples. Yet the official explanations—swamp gas, weather balloons, and more—just don't match up with these reports. The "Nonsense" Papers anthology explores these controversial and contemporary issues, considering a wide variety of interrelated topics: • UFOs • Military "black projects" based on alien technology • Former NASA missions (and the possible secrets they hold) • An alternative view on organized

religious cults (and how their origin by our creators from the stars) • Environmental issues, including climate change • Time travel • Testimonies from those who offer insight on alien contact • The future and fate of our planet after 2012 This collection also focuses on humanity and culture, examining where we are headed if we continue down our current path. It questions those who plan to “save” humanity by making exaggerated claims and impossible goals and challenges us to analyze and examine ourselves and our society as a whole. It implores humans to use common sense, rationality, and logic as our present life seems void of feelings, dreams, hopes, and desires. Overall, the only way humans can save these precious ideologies is in the discovery of ourselves.

The Need for a Sacred Science

The Lilean Chronicles: Book One ~ Redemption

Irish Varieties

In 2010, Nick Polizzi did something unimaginable. He assembled a group of eight desperately ill patients from around the world and brought them into the heart of

the Amazon rainforest to put the mysterious medicines of native shamans to the test. The healing journey that unfolded would change their lives —and his own —forever. In *The Sacred Science*, we join Nick as he explores these primordial traditions and learns firsthand what it takes to truly heal ourselves of physical disease, emotional trauma, and the sense of “lostness” that so many of us feel in these modern times. We venture into a place where the ordinary rules we live by, even survival instincts, don’t apply —where “the only thing to do is to step forward and be ready for anything.” Nick is not a guru or shaman; he is an ordinary guy who pieced together an illuminating journey, one experience at a time. In this riveting true story, we’re shown the many layers that must be peeled away in order for us to find the truth of who we are and why we’re here. This book is a bridge between the flashy, fast-moving modern world and the forgotten ways of a healthier, earth-connected ancestral past. You’ll find practices and principles of native wisdom that you can put to use in your own life, and you’ll gain a new understanding of what it means to heal. In the end, what will become of the eight patients who set out on this path with Nick? Will the exotic jungle medicines and harrowing rites of passage destroy them or give them a new lease on life? Five will return with remarkable healing results. Two will return disappointed. One won’t return at all.

After God is Dibia: Igbo cosmology, healing, divination &

sacred science in Nigeria

A Trooper Galahad

A study of the 100,000-year-old spiritual science of ancient Egypt • Examines the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks, and Celts, showing that each is based on the same central concepts from time immemorial • Reveals that the ancient Egyptians believed in reincarnation and a spiritual evolutionary process • Explains the connections between the movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades and circumpolar stars to the Egyptians, and the fundamental unity of the Egyptian pantheon • Investigates the people who colonized greater Egypt 100,000 years ago, descendants of the Atlanteans In *Esoteric Egypt*, J. S. Gordon reveals how the sacred science and wisdom tradition of ancient Egypt--the Land of Khem--stems from an advanced prehistoric worldwide civilization. Examining the metaphysical structure of our universe as seen by the ancient Egyptians, Greeks, and Celts, he shows that each tradition is merely a variation on the central concepts of the precession of the equinoxes and the obliquity of the ecliptic pole. He explores the connections between the cyclical movements of Orion and Sirius and the story of Osiris and Isis, the importance of the Pleiades and the circumpolar stars, and the

ancient tradition of man as a divine being “born from the substance of the stars.” He investigates the people who colonized greater Egypt 100,000 years ago, the progenitors of ancient Egyptian civilization descended from the 4th- and 5th-Root Race Atlanteans. Gordon explores the magical and esoteric meanings behind Egyptian sacred ritual and temple art, drawing parallels to the Mystery School process of initiation. Explaining the fundamental unity of the Egyptian pantheon and the structure of the after-death state, he shows that the Egyptians clearly believed in reincarnation and a spiritual evolutionary process. Revealing the ancient sacred science of the Land of Khem, teachings passed down from the earliest times, he examines the psychospiritual nature of the human being and the function of our spiritual identity and our souls.

Science and Key of Life

A Century of Science and Other Essays

Sacred Science?

This remarkable book grew out of a conference headed by René Guénon, the

sinologist René Grousset, and the neo-Thomist Jacques Maritain on questions raised by Ferdinand Ossendowski's thrilling account in his *Men, Beast and Gods* of an escape through Central Asia, during which he foils enemies and encounters shamans and Mongolian lamas, whose marvels he describes. The book caused a great sensation, especially the closing chapters, where Ossendowski recounts legends allegedly entrusted to him concerning the 'King of the World' and his subterranean kingdom Agartha. The present book, one of Guénon's most controversial, was written in response to this conference and develops the theme of the King of the World from the point of view of traditional metaphysics. Chapters include: Western Ideas about Agartha; Shekinah and Metatron; The Three Supreme Functions; Symbolism of the Grail; Melki-Tsedeq; Luz: Abode of Immortality; The Supreme Center concealed during the Kali-Yuga; and The Omphalos and Sacred Stones .

Sacred Science

In *Symbols of Sacred Science*, Guénon, a master of precise, even 'mathematical' metaphysical exposition, reveals himself as a consummate exegete of myth and symbolism as well, superior in many ways to Mircea Eliade, and comparable perhaps only to his respected friend Ananda K. Coomaraswamy. This extraordinary text unveils the cosmological meanings of root symbols organized under such general headings as: The Center of the World, Cyclic Manifestation, Symbolic

Weapons, Axial Symbolism and the Symbolism of Passage, The Symbolism of Building, and The Symbolism of the Heart. Far more than a simple catalogue of myths and symbols from many traditions, Symbols of the Sacred Science lays the foundation for a universal esoteric symbology. In this work, Guénon demonstrates the fundamental unity-across all cultures and ages-of the images with which the Absolute clothes itself in its cosmic self-revelation.

The Sacred Science

R. A. Schwaller de Lubicz (1887-1961), one of the most important Egyptologists of this century, links the sacred science of the Ancients to its rediscovery in our own time. Sacred Science represents the first major breakthrough in understanding ancient Egypt and identifies Egypt, not Greece, as the cradle of Western thought, theology, and science.

The Secret Doctrine: the Synthesis of Science, Religion, and Philosophy

John Anthony West's revolutionary reinterpretation of the civilization of Egypt challenges all that has been accepted as dogma concerning Ancient Egypt. In this pioneering study West documents that: Hieroglyphs carry hermetic messages that

convey the subtler realities of the Sacred Science of the Pharaohs. Egyptian science, medicine, mathematics, and astronomy were more sophisticated than most modern Egyptologists acknowledge. Egyptian knowledge of the universe was a legacy from a highly sophisticated civilization that flourished thousands of years ago. The great Sphinx represents geological proof that such a civilization existed. This revised edition includes a new introduction linking Egyptian spiritual science with the perennial wisdom tradition and an appendix updating West's work in redating the Sphinx. Illustrated with over 140 photographs and line drawings.

Thrice-Greatest Hermes

Outlines the principles and mechanics of the soul body, the spiritual vehicle that enables individual consciousness to survive the body's death • Shows that the ancient Vedic, Egyptian, Hebraic, and Pythagorean traditions shared and understood this spiritual practice • Reveals modern science as only now awakening to this ancient sacred science Ancient peoples the world over understood that individual consciousness is rooted in a universal field of consciousness and is therefore eternal, surviving the passing of the physical body. They engaged in spiritual practices to make that transition maximally auspicious. These practices can be described as a kind of alchemy, in which base elements are discarded and higher levels of consciousness are realized. The result is the creation of a vehicle, a soul body, that carries consciousness beyond physical death. These spiritual

preparations are symbolized in the Vedic, Egyptian, and Hebraic traditions as a divine stairway or ladder, a step-by-step path of ascent in which the practitioner raises consciousness by degrees until it comes to rest in the bosom of the infinite, thereby becoming “immortal.” This spiritual process explains the reincarnation of the Dalai Lama, for example, whose reincarnation is confirmed in infancy through physical and spiritual signs, indicating that the consciousness has been carried from one lifetime to the next. In *Creating the Soul Body*, Robert Cox maps the spiritual journey of consciousness behind this sacred science of immortality and reveals the practice of creating a soul body in detail. He also shows that this ancient spiritual science resembles advanced theories of modern science, such as wave and particle theory and the unified field theory, and reveals that modern science is only now awakening to this ancient science of “immortality.”

The Glories of the Sacred Heart

"The Sacred Heart is, as Simeon prophesied of Jesus Himself, 'Signum cui contradicetur.' Like the title of His Blessed Mother, who is in very truth 'Mother of God,' it has drawn to itself all the assaults of heresy. For it is a divine test of faith in the mystery of the Word made Flesh, 'ut revelentur ex multis cordibus cogitationes.' Those who have trusted with a yearning hope that the faith of Englishmen, in the Incarnation at least, was firm and clear were saddened and silenced when the pilgrimage to Paray-le-Monial elicited from some of the highest

sources of the established religion a profession of simple Nestorianism. It was then that the first fifty pages in this book were published. Having been out of print for some time, they are now reprinted, as the doctrinal foundation of all that follows. The devotion of the Sacred Heart has two aspects: the one as the centre of all dogma; the other as the source of the deepest devotion. In this latter aspect it reveals to us the personal love of our Divine Redeemer towards each and every one for whom He died. It is a manifestation of His pity, tenderness, compassion, and mercy to sinners and to penitents. Nevertheless, its chief characteristic and its dominant note is His disappointment at the returns we make to Him for His love, and above all, His divine displeasure at the faults and sins of those who are specially consecrated at His service. He seems to be sadly upbraiding us with the three doubting questions which He put to Peter, 'Lovest thou Me?' and to be looking upon us as He turned and looked on him, when he had thrice denied his Master. Into this part of the devotion of the Sacred Heart I have not ventured. It has already been treated so profusely by others, and by many of whom I have only to learn; it is in itself so deep and intimately related to the personal life and mind of each, that I have always felt it better to use but few suggestive words rather than to draw out devotional acts, which to the writer are no doubt spontaneous, natural, and real, but to the reader may be a burden like Saul's armour to David. In the following pages, therefore, I have intentionally confined myself to the dogmatic side of the devotion; and for the following reasons. I believe firmly that when divine truth is fully and duly apprehended it generates devotion; that one cause of

shallowness in the spiritual life is a superficial apprehension of the dogma of the Incarnation; and that one divine purpose in the institution and diffusion of the devotion of the Sacred Heart, in these last times, is to reawaken in the minds of men the consciousness of their personal relation to a Divine Master. He has foretold the dimness and coldness of these latter days: 'The Son of Man, when He cometh, shall He find, think you, faith on the earth? (S. Luke xviii. 8.)' 'Because iniquity hath abounded, the charity of many shall grow cold (S. Matt. xxiv. 12).' In that day the disciples of the Sacred Heart at least will 'know whom they have believed.'"--

A Dictionary, Bengali and Samskrit, Explained in English, and Adepted for Students of Either Language; to Which is Added an Index Serving as a Reserved Dictionary

This landmark work by an innovative modern Kabbalist develops a scientific model for kabbalistic cosmology and soul psychology. Derived from the kabbalistic diagram of the Tree of Life and the author's own Sabbath Star diagram, this universal model encodes the laws of all cosmic manifestation, giving a mathematical basis to many aspects of this mystical tradition and providing a new synthesis of science and spirituality that may well write a new chapter to the Kabbalah.

Religious Confessions and the Sciences in the Sixteenth Century

The Secret Doctrine of the Kabbalah resurrects this ancient body of knowledge to reveal eternal truths that profoundly impact contemporary spirituality. Experimental methods of practicing Hebraic sacred science are explored that explain, as never before, the meaning of the cosmological diagram of the entire Western esoteric tradition--the kabbalistic Tree of Life.

The Sacred Laws of the Âryas as Taught in the Schools of Âpastamba, Guatama, Visishtha, and Baudhâyana: Âpastamba and Gautama

The King of the World

Serpent in the Sky

"The current book is a collection of essays, speech transcripts, and reprints that were written and compiled by John Fiske. This text, published in 1899, includes

discussions on science, evolution, philosophy, and liberal thought." (PsycINFO Database Record (c) 2008 APA, all rights reserved).

The Secret Doctrine of the Kabbalah

This is the edition including all three books. The so-called Hermetic writings have been known to Christian writers for many centuries. The early church Fathers (Justin Martyr, Tertullian, Clement of Alexandria) quote them in defense of Christianity. Stobaeus collected fragments of them. The Humanists knew and valued them. They were studied in the sixteenth and seventeenth centuries, and in modern times have again been diligently examined by many scholars. G. R. S. Mead has issued a translation of the whole body of extant literature, with extended prolegomena, commentary, etc. There is a wide difference of opinion as to the date at which this literature was produced. Mead believes that some of the extant portions of it are at least as early as the earliest Christian writings, while von Christ assigns them to the third Christian century, and thinks that they show the influence of neo-Platonism. To affirm that they influenced New Testament usage would be hazardous, but they perhaps throw some light on the direction in which thought was moving in New Testament times.
