500 Common Chinese Idioms

Suitable for college and high school students and those learning on their own, this fully illustrated coursebook provides comprehensive instruction in the history and practical techniques of Chinese calligraphy. No previous knowledge of the language is required to follow the text or complete the lessons. The work covers three major areas: 1) descriptions of Chinese characters and their components, including stroke types, layout patterns, and indications of sound and meaning; 2) basic brush techniques; and 3) the social, cultural, historical, and philosophical underpinnings of Chinese calligraphy—all of which are crucial to understanding and appreciating this art form. Students practice brush writing as they progress from tracing to copying to free-hand writing. Model characters are marked to indicate meaning and stroke order, and well-known model phrases are shown in various script types, allowing students to practice different calligraphic styles. Beginners will find the author's advice on how to avoid common pitfalls in writing brush strokes invaluable. Chinese Writing and Calligraphy will be welcomed by both students and instructors in need of an accessible text on learning the fundamentals of the art of writing Chinese characters.

This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure of written communication. Packed with examples and exercises, Natural Language Processing with Python will help you: Extract information from unstructured text, either to guess the topic or identify "named entities" Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web

"DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone." --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York "Professor DeFrancis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted." --William S.Y. Wang, professor of linguistics, University of California at Berkeley

The Handbook of Chinese Linguistics is the first comprehensive introduction to Chinese linguistics from the perspective of modern theoretical and formal linguistics. Containing twenty-five chapters, the book offers a balanced, accessible and thoughtfully organized introduction to some of the most important results of research into Chinese linguistics carried out by theoretical linguists during the last thirty years. Presenting critical overviews of a wide range of major topics, it is the first to meet the great demand for an overview volume on core areas of Chinese linguistics. Authoritative contributions describe and assess the major achievements and controversies of research undertaken in each area, and provide bibliographies for further reading. The contributors refer both to their own work in relevant fields,

and objectively present a range of competitor theories and analyses, resulting in a volume that is fully comprehensive in its coverage of theoretical research into Chinese linguistics in recent years. This unique Handbook is suitable both as a primary reader for structured, taught courses on Chinese linguistics at university level, and for individual study by graduates and other professional linguists.

Chinese Writing and Calligraphy

The Shang Han Lun (simplified Chinese: 伤寒论; traditional Chinese: 傷寒論; pinyin: Shānghán lùn) known in English as the Treatise on Cold Damage Disorders or the Treatise on Cold Injury, is a Chinese medical treatise that was compiled by Zhang Zhongjing sometime before the year 220, at the end of the Han dynasty. It is

amongst the oldest complete clinical textbooks in the world, and one of the four canonical works that students must study in traditional Chinese medical education today. The current edition is in ten volumes including the first to chapters on pulse diagnosis. The Shang Han Lun has 398 sections with 113 herbal prescriptions, organised into the Six Divisions corresponding to six stages of disease.

Xi Jinping wants to become the world's most powerful leader. To succeed, he must balance Mao's Little Red Book with the Analects of Confucius, and more. For Xi, the task ahead of China is to preserve the guiding ideology of Marxism, while challenging mistaken credos like neoliberalism, constitutional democracy, and 'universal values'. China must have total faith in its own brand of socialism, blended meaningfully with Chinese tradition. And this system must revolve around one man--around Xi and 'Xi-ism'. François Bougon's compelling biography exposes the historical, philosophical, political and personal narratives that Xi has skilfully woven together to create a superpower in his own image. Is Xi's China a land of 'new market totalitarianism'? Will this be the price of the Chinese dream?

They hope this sacrifice will keep her from terrorizing their town. But the witch in the Forest, Xan, is kind. She shares her home with a wise Swamp Monster and a Perfectly Tiny Dragon. Xan rescues the children and delivers them to welcoming families on the other side of the forest, nourishing the babies with starlight on the journey. One year, Xan accidentally feeds a baby moonlight instead of starlight, filling the ordinary child with extraordinary magic. Xan decides she must raise this girl, whom she calls Luna, as her own. As Luna's thirteenth birthday approaches, her magic begins to emerge--with dangerous consequences. Meanwhile, a young man from the Protectorate is determined to free his people by killing the witch. Deadly birds with uncertain intentions flock nearby. A volcano, quiet for centuries, rumbles just beneath the earth's surface. And the woman with the Tiger's heart is on the prowl .

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and

"The approach that has helped thousands of learners memorize Japanese kanji has been adapted to help students with Chinese characters. Remembering Simplified Hanzi covers the writing and meaning of the 1,000 most commonly used characters in the traditional Chinese writing system, plus another 500 that are best learned at an early stage." "Of critical importance to the approach found in these pages is the systematic arranging of characters in an order best suited to memory. In the Chinese writing system, strokes and simple components are nested within relatively simple characters, which can, in turn, serve as parts of more complicated characters and so on. Taking advantage of this allows a logical ordering, making it possible for students to approach most new characters with prior knowledge that can greatly facilitate the learning process."--BOOK JACKET.

The Chinese Language

In this long-awaited ethnography, Chuan-kang Shih details the traditional social and cultural conditions of the Moso, a matrilineal group living on the border of Yunnan and Sichuan Provinces in southwest China. Among the Moso, a majority of the adult population practice a visiting system called tise instead of marriage as the normal sexual and reproductive institution. Until recently, tise was noncontractual, nonobligatory, and nonexclusive. Partners lived and worked in separate households. The only prerequisite for a tise relationship was a mutual agreement between the man and the woman to allow sexual access to each other. In a comprehensive account, *Quest for Harmony* explores this unique practice specifically, and offers thorough documentation, fine-grained analysis, and an engaging discussion of the people, history, and structure of Moso society. Drawing on the author's extensive fieldwork, conducted from 1987 to 2006, this is the first ethnography of the Moso written in English.
