Complete Criminal Law

This book is a comprehensive analysis of the criminal defence of self-defence from a philosophical, legal and human rights perspective. The primary focus is on self-defence as a defence to homicide, as this is the most difficult type of self-defensive force to justify. Although not always recognised as such, self-defence is a contentious defence, permitting as it does the victim of an attack to preserve her life at the expense of another. If one holds that all human life is of equal value, explaining why this is permissible poses something of a challenge. It is particularly difficult to explain where the aggressor is, for reasons of non-age or insanity for example, not responsible for her actions. The first part of the book is devoted to identifying the proper theoretical basis of a claim of self-defence. It examines the

classification of defences, and the concepts of justification and excuse in particular, and locates self-defence within this classification. It considers the relationship between self-defence and the closely related defences of duress and necessity. It then proceeds critically to analyse various philosophical explanations of why self-defensive killing is justified, before concluding that the most convincing account is one that draws on the right to life with an accompanying theory of forfeiture. The book then proceeds to draw upon this analysis to examine various aspects of the law of self-defence. There is detailed analysis of the way in which, on a human rights approach, it is appropriate to treat the issues of retreat, imminence of harm, self-generated self-defence, mistake and proportionality, with a particular focus on whether lethal force is ever permissible in protecting property or in preventing rape. The analysis draws on material from all of the major common law jurisdictions. The book concludes with an examination of the implications that the European Convention on Human Rights might have for the law of self-defence, especially in the areas of mistaken belief and the degree of force permissible to protect property.

and the extensive case law which has grown up around them. Important new material includes the House of Lords decision in *R v Preddy* (1996) 3 All ER 481 and the Theft (Amendment) Act 1996 which rapidly followed, primarily to fill the serious lacunae in the law created by *Preddy*. These developments, along with such important decisions as those in *Mazo* (1996) Crim LR 435 and *Hopkins and Kendrick* (1997) Crim LR 359, which suggest some limitations on the far-reaching *Gomez* case, have been fully incorporated to give an accurate and fully argued statement of the law of theft as at 1 May 1997.

Criminal Law

Criminal cases raise difficult normative and legal questions, and are often a consequence of compelling human drama. In this collection, expert authors place leading cases in criminal law in their historical and legal contexts, highlighting their significance both in the past and for the present. The cases in this volume range from the fifteenth to the twenty-first century. Many of them are well known to modern criminal lawyers and students; others are overlooked landmarks that deserve reconsideration. The essays, often based on extensive and original archival research, range over a wide spectrum of criminal law, covering procedure and doctrine, statute and common law, individual offences and general principles. Together, the essays explore common themes, including the scope of criminal law and criminalisation, the role of the jury, and the causes of change in criminal law.

Criminal Law

Presently, many of the greatest debates and controversies in international criminal law concern modes of liability for international crimes. The state of the law is unclear, to the detriment of accountability for major crimes and of the uniformity of international criminal law. The present book aims at clarifying the state of the law and provides a thorough analysis of the jurisprudence of international courts and tribunals, as well as of the debates and the questions these debates have left open. Renowned international criminal law scholars analyze, in discrete chapters, the modes of liability one by one; for each mode they identify the main trends in the jurisprudence and the main points of controversy. An introduction addresses the cross-cutting issues, and a conclusion anticipates possible evolutions that we may see in the future. The research on which this book is based was undertaken with the Geneva Academy.

Each chapter is followed by a comment from a different author, providing an additional expert view on each reform proposal. Finally, the

last two chapters broaden the debate to discuss criminal law reform in general, examining various reform bodies and mechanisms across England, Wales and Scotland.
