Discovering Our Past

In *Writers Are Readers*, the mutually supportive roles of reading and writing are made visible through the idea of "flipsides;" how a reader's insights can be turned around to provide insights into his own writing, and vice versa. Lester and Reba's trademark engaging style is woven throughout chapters full of sample lessons, student writing samples, and recommended texts for maximizing the flipped concept across the year. "Leading the student to understand what he did as a reader can become a lens that brings into focus what the writer had to do before a reader ever saw the page," they write. Discover fresh new ways to turn reading strategies into writing opportunities that your students will be excited about and deeply understand.

Cutting Through the Hype

From the New York Times bestselling creators of Click, Clack, Moo, comes an entertaining introduction to politics. My fellow Americans: It is our pleasure, our honor, our duty as citizens to present to you Duck for President. Here is a duck who began in a humble pond. Who worked his way to farmer. To governor. And now, perhaps, to the highest office in the land. Some say, if he walks like a duck and talks like a duck, he is a duck. We say, if he walks like a duck and talks like a duck, he will be the next president of the United States of America. Thank you for your vote.

Written by the lead authors of the C3 Framework, *Inquiry-Based Practice in Social Studies Education: Understanding the Inquiry Design Model* presents a conceptual base for shaping the classroom experience through inquiry-based teaching and learning. Using their Inquiry Design Model (IDM), the authors present a field-tested approach for ambitious social studies teaching. They do so by providing a detailed account of inquiry's scholarly roots, as well as the rationale for viewing questions, tasks, and sources as inquiry's foundational elements. Based on work done with classroom teachers, university faculty, and state education department personnel, this book encourages readers to transform classrooms into places where inquiry thrives as everyday practice. Both pre-service and in-service teachers are sure to learn strategies for developing the reinforcing elements of IDM, from planning inquiries to communicating conclusions and taking informed action. The curricular and pedagogical examples included make this practical book essential reading for researchers, students of pre-service and in-service methods courses, and professional development programs.

Every major measure of students' historical understanding since 1917 has demonstrated that students do not retain, understand, or enjoy their school experiences with history. Bruce Lesh believes that this is due to the way we teach history -- lecture and memorization. Over the last fifteen years, Bruce has refined a method of teaching history that mirrors the process used by historians, where students are taught to ask questions of evidence and develop historical explanations. --from publisher description.

Inquiry-Based Practice in Social Studies Education

The idea for this book came while I was observing a student teacher and a master teacher. I realized that most student teachers while in training do not have the opportunity to think creatively about their lessons. I also noticed that teachers new to the field of teaching suffer the same fate; they are too busy trying to survive the day and are not sure how to plan and organize their teaching. Lesson plans are one of the most important tools for a teacher and more important for the novice teacher. I believe that during student teaching or during their undergraduate years, if students were equipped with this book their first year teaching will not look so first year. Imagine an undergraduate class filled with soon to be Social Studies teachers discussing these selected lesson plans, improving upon them and making them their own. Most first year teachers over teach or under teach and both types still miss the marks on the standardized test. These lesson plans will give the new teacher a place to begin.
