Are you responsible for starting new teams, providing direction, allocating resources, removing roadblocks, and serving as an all-around champion for high-performance work teams? This practical, step-by-step guide is for you! Not only does this pocket reference emphasize the importance of turning slogans and talk into action, it tells how to do it. You'll get helpful guidelines for turning the principles of team management into day-to-day actions. Each chapter begins with a set of questions that the sponsor must ask before starting any team. The answers to these questions provide the keys to whether the project or activity actually warrants the effort that goes into a successful team. Once the need for the team has been clearly established, a checklist outlines the necessary actions the

sponsor must take to successfully start and maintain the team. The remainder of each chapter provides the details and specific instructions for carrying out the activities on the checklist. Many of the steps include exercises, activities, or assignments to enhance the learning points. Covers the most common types of teams and team support elements.

"Business Schools Face Test of Faith." "Is It Time to Retrain B-Schools?" As these headlines make clear, business education is at a major crossroads. For decades, MBA graduates from top-tier schools set the standard for cutting-edge business knowledge and skills. Now the business world has changed, say the authors of *Rethinking the MBA*, and MBA programs must change with it. Increasingly, managers and recruiters are questioning conventional business education. Their concerns? Among other things, MBA programs aren't giving students the heightened cultural awareness and global perspectives they need. Newly minted MBAs lack essential leadership skills. Creative and critical thinking demand far more attention. In this compelling and authoritative new book, the authors:

- Document a rising chorus of concerns about business schools gleaned from extensive interviews with deans and executives, and from a detailed analysis of current curricula and emerging trends in graduate business education
- Provide case studies showing how leading MBA programs have begun reinventing themselves for the better
- Offer concrete ideas for how business schools can surmount the challenges that come with reinvention, including securing faculty with new skills and experimenting with new pedagogies

Rich with examples and thoroughly researched, *Rethinking the MBA* reveals why and how business schools must define a better pathway for the future.

“A Mutual Responsibility and a Moral Obligation”

Considers earlier efforts to finance nonprofit organizations by means of "fiscal agency," the legal problems which ensued, and efforts to correct them through "fiscal sponsorship."

A clear, practical guide to implementing Open Innovation for new product development *Open Innovation: New Product Development Essentials* from the PDMA is a comprehensive guide to the theory and practice of the Open Innovation method. Written by experts from the Product Development and Management Association, the book packages a collection of Open Innovation tools in a digestible and actionable format. Real-world case studies drawn from the authors' own successes and failures illustrate the concepts presented, providing accurate

representation of the opportunities and challenges of Open Innovation implementation. Key tools are presented with a focus on immediate applications for business, allowing NPD professionals to easily discern where this cutting edge development method can push innovation forward. Open Innovation assumes that companies can and should use both internal and external ideas and paths to market, permeating the boundaries between firm and environment. Innovations transfer outward and inward through purchase, licensing, joint ventures, and spin-offs, allowing companies to expand beyond their own research and dramatically improve productivity through collaboration. PDMA Essentials provides practical guidance on exploiting the Open Innovation model to these ends, with clear guidance on all aspects of the new product development process. Topics include: Product platforming and idea competitions Customer immersion and interaction Collaborative product design and development Innovation networks, rewards, and incentives Many practitioners charged with innovation have only a vague understanding of the specific tools available for Open Innovation, and how they might be applied. As the marketplace shifts dramatically to keep pace with changing consumer behaviors, remaining relevant increasingly means ramping up innovation processes. PDMA Essentials provides the tools NPD practitioners need to implement a leading innovation method, and drive continued growth.

For those who teach students in psychology, education, and the social sciences, the Handbook of Demonstrations and Activities in the Teaching of Psychology, Second Edition provides practical applications and rich sources of ideas. Revised to include a wealth of new material (56% of the articles are new), these invaluable

reference books contain the collective experience of teachers who have successfully dealt with students' difficulty in mastering important concepts about human behavior. Each volume features a table that lists the articles and identifies the primary and secondary courses in which readers can use each demonstration. Additionally, the subject index facilitates retrieval of articles according to topical headings, and the appendix notes the source as it originally appeared in *Teaching of Psychology*, the official journal of the Society for the Teaching of Psychology, Division Two of the American Psychological Association. Volume I consists of 97 articles about strategies for teaching introductory psychology, statistics, research methods, and the history of psychology classes. Divided into four sections (one for each specialty), the book suggests ways to stimulate interest, promote participation, grasp psychological terminology, and master necessary scientific skills.

Multistate Guide to Sales and Use Taxation: Construction provides guidance to construction contractors for dealing with the difficult sales and use tax issues inherent in their businesses, particularly if they operate in several states. In

addition to the usual problems in complying with different bodies of law, administering a hodge-podge of state and local tax rates, and dealing with a variety of tax agency audit programs, the contract process and insufficient recordkeeping further complicate an already complicated task.

The Code of Federal Regulations of the United States of America

How well do we know our country? Whom do we include when we use the word "American"? These are not just contemporary issues but recurring questions Americans have asked themselves throughout their history--and questions that were addressed when, in 1935, the Roosevelt administration created the Federal Writers' Project (FWP) under the aegis of the Works Progress Administration. Although the immediate context of the FWP was work relief, national FWP officials developed programs that spoke to much larger and longer-standing debates over the nature of American identity and culture and the very definition of who was an American. Hirsch reviews the founding of the FWP and the significance of its American Guide series, considering the choices made by administrators who wanted to celebrate diversity as a positive aspect of American cultural identity. In his exploration of the FWP's other writings, Hirsch discusses the project's pioneering use of oral history in interviews with ordinary southerners, ex-slaves, ethnic minorities, and industrial workers. He also examines congressional critics of the FWP vision; the occasional opposition of local Federal Writers, especially in the South; and how the FWP's vision changed in response to the challenge of World War II. In the course of this study, Hirsch raises thought-provoking questions about the relationships between diversity and unity, government and culture, and, ultimately, culture and democracy.

The role of project sponsor is critical in large projects during the development of the business case, for governance and assurance and as the person who decides that the project should continue or close at any stage. Yet in many organizations the skills of the sponsor are often assumed; he or she will be a senior manager who may well have no practical project experience at all. David West explains the roles and skills that lie at the heart of effective sponsorship. The sponsor acts as a lynchpin between the Board and the Project Manager, communicating and translating requirements downwards and resource needs, progress and constraints back upwards. An over-zealous sponsor may be tempted to assume some of the project manager's responsibilities, whilst an ineffective sponsor may be invisible, leaving the project manager uninformed by, and unrepresented to, the Board. Project Sponsorship includes exercises, examples and case histories from the real world of projects. It is an essential guide for anyone assuming the important role of managing the business case of the project and will help you ensure that the organization is 'doing the right things' as well as 'doing things right'.
