High and Mighty Queens of Early Modern England

Collects 150 hymns, explains the history of each hymn, and includes biographical information on the authors.

A Comprehensive History of Norwich

An examination of nanotechnology as a lens through which to study contemporary democracy in both theory and practice. In *Democratic Experiments*, Brice Laurent discusses the challenges that emerging technologies create for democracy today. He focuses on nanotechnology and its attendant problems, proposing nanotechnology as a lens through which to understand contemporary democracy in both theory and practice. Arguing that democracy is at stake where nanotechnology is defined as a problem, Laurent examines the sites where nanotechnology is discussed and debated by scientists, policymakers, and citizens. It is at these sites where the joint production of nanotechnology and the democratic order can be observed. Focusing on the United States, France, and Europe, and various international organizations, Laurent analyzes representations of nanotechnology in science museums, collective discussions in participatory settings, the making of categories such as “nanomaterials” or responsible innovation” in standardization and regulatory arenas, and initiatives undertaken by social movements. He contrasts American debates, in which the concern for public objectivity is central, with the French “state experiment,” the European goal of harmonization, and the international concern with a global market. In France, public debate proceeded in response to public

protest and encountered a radical critique of technological development; the United States experimented with an innovative approach to technology assessment. The European regulatory approach results in lengthy debates over political integration; the United States relies on the adversarial functioning of federal agencies. Because nanotechnology is a domain where concerns over anticipation and participation are pervasive, Laurent argues, nanotechnology—and science and technology studies more generally—provides a relevant focus for a renewed analysis of democracy.

Pandaemonium 1660-1886

Interest Rate Markets

A Choice of Emblems

High and Mighty Queens of Early Modern England is a truly interdisciplinary anthology of essays including articles on such actual queen regnants as Mary I and Elizabeth I, and queen consorts such as Anne Boleyn, Anna of Denmark, and Henrietta Maria. The collection also deals with a number of literary representations of earlier historical queens such as Cleopatra, and semi-historical ones such as Gertrude, Tamora, and Lady Macbeth, and such fictional ones as Hermione and the queen of Cymbeline, all of them Shakespeare characters. This fascinating look at Renaissance queens also examines myth and folklore, Romantic or

Victorian representations, and the depictions of queens like Catherine de Medici of France in twentieth century film.

The Art Of Speculation

A Book about Doctors

A Book for a Rainy Day; or, Recollections of the Events of the Years 1766-1833

Romanticism and Women Poets

The Literary Agenda is a series of short polemical monographs about the importance of literature and of reading in the wider world and about the state of literary education inside schools and universities. The category of 'the literary' has always been contentious. What is clear, however, is how increasingly it is dismissed or is unrecognised as a way of thinking or an arena for thought. It is sceptically challenged from within, for example, by the sometimes rival claims of cultural history, contextualized explanation, or media studies. It is shaken from without by even greater pressures: by economic exigency and the severe social attitudes that can follow from it; by technological change that may leave the traditional forms of serious human communication looking merely antiquated. For just these reasons this is the right time for renewal, to start reinvigorated work into

the meaning and value of literary reading. Repetition and Identity offers a theory of the existing thing as such. A thing only has identity and consistency when it has already been repeated, but repetition summons difference and the shadow invocation of a connecting sign. In contrast to the perspectives of Post-structuralism, Catherine Pickstock proposes that signs are part of reality, and that they truthfully express the real. She also proposes that non-identical repetition involves analogy, rather than the Post-structuralist combination of univocity and equivocity, or of rationalism with scepticism. This proposal, which is happy for reality to make sense, involves, however, a subjective decision which is to be poetically performed. A wager is laid upon the possibility of a consistency which sustains the subject, in continuity with the elusive consistency of nature. This wager is played out in terms of a performative argument concerning the existential stances open to human beings. It is concluded that the individual sustains this quest within the context of an inter-subjective search for an historical consistency of culture. But can ethical consistency, and the harmonisation of this with an aesthetic surplus of an 'elsewhere', invoked by the sign, be achieved without a religious gesture? And can this gesture avoid a tragic tension between ethical commitment and religious renunciation? Pickstock suggests a Kierkegaardian re-reading of the Patristic categories of 'recapitulation' and 'reconstitution' can reconcile this tension. The quest for the identity and consistency of the thing leads us from the subject through fiction and history and to sacred history, to shape an ontology which is also a literary theory and a literary artefaction.

The Eurodollar Futures and Options Handbook

The Every-Day Book, Or

Philip L. Carret (1896-1998) was a famed investor and founder of The Pioneer Fund (Fidelity Mutual Trust), one of the first Mutual Funds in the United States. A former Barron's reporter and WWI aviator, Carret launched the Mutual Trust in 1928 after managing money for his friends and family. The initial effort evolved into Pioneer Investments. He ran the fund for 55 years, during which an investment of \$10,000 became \$8 million. Warren Buffett said of him that he had "the best long term investment record of anyone I know" He is most famous for the long successful track record he achieved investing in Common Stocks and for being one of Warren Buffett's role models. This book comprises a series of articles written for Barron's and published in book form in 1930.—Print Ed.

The Sterling Bonds and Fixed Income Handbook

A book that revolutionised our understanding of English social history. E. P. Thompson shows how the English working class emerged through the degradations of the industrial revolution to create a culture and political consciousness of enormous vitality.

Trading Stir Futures

Eurodollar trading volume is exploding, with no end in sight tools phenomenal growth. The Eurodollar Futures and Options Handbook provides traders and investors with the complete range of current research on Eurodollar futures and options, now the most widely traded money market contracts in the world. The only current book on this widely-followed topic, it features chapters written by Eurodollar experts from JP Morgan, Mellon Capital, Merrill Lynch, and other global trading giants, and will quickly become a required reference for all Eurodollar F&O traders and investors.

Evaluation Models

An indispensable resource for researchers and students in materials science, chemistry, physics, and pharmaceuticals Written by one of the pioneers of 2D X-Ray Diffraction, this updated and expanded edition of the definitive text in the field provides comprehensive coverage of the fundamentals of that analytical method, as well as state-of-the art experimental methods and applications. Geometry convention, x-ray source and optics, two-dimensional detectors, diffraction data interpretation, and configurations for various applications, such as phase identification, texture, stress, microstructure analysis, crystallinity, thin film analysis, and combinatorial screening are all covered in detail. Numerous experimental examples in materials research, manufacture, and pharmaceuticals are provided

throughout. Two-dimensional x-ray diffraction is the ideal, non-destructive analytical method for examining samples of all kinds including metals, polymers, ceramics, semiconductors, thin films, coatings, paints, biomaterials, composites, and more. Two-Dimensional X-Ray Diffraction, Second Edition is an up-to-date resource for understanding how the latest 2D detectors are integrated into diffractometers, how to get the best data using the 2D detector for diffraction, and how to interpret this data. All those desirous of setting up a 2D diffraction in their own laboratories will find the author's coverage of the physical principles, projection geometry, and mathematical derivations extremely helpful. Features new contents in all chapters with most figures in full color to reveal more details in illustrations and diffraction patterns Covers the recent advances in detector technology and 2D data collection strategies that have led to dramatic increases in the use of two-dimensional detectors for x-ray diffraction Provides in-depth coverage of new innovations in x-ray sources, optics, system configurations, applications and data evaluation algorithms Contains new methods and experimental examples in stress, texture, crystal size, crystal orientation and thin film analysis Two-Dimensional X-Ray Diffraction, Second Edition is an important working resource for industrial and academic researchers and developers in materials science, chemistry, physics, pharmaceuticals, and all those who use x-ray diffraction as a characterization method. Users of all levels, instrument technicians and X-ray laboratory managers, as well as instrument developers, will want to have it on hand.

History of Education in Mississippi

In this ground-breaking study of the complex relationship between war, gender, and citizenship in Great Britain during World War I, Nicoletta Gullace shows how the assault on civilian masculinity led directly to women's suffrage. Through recruiting activities such as handing out white feathers to reputed 'cowards' and offering petticoats to unenlisted 'shirkers', female war enthusiasts drew national attention to the fact that manhood alone was an inadequate marker of civic responsibility. Proclaiming women's exemplary service to the nation, feminist organizations tapped into a public culture that celebrated military service while denigrating those who opposed the war. Drawing on the vast range of popular and official sources, Gullace reveals that the war had revolutionary implications for women who wished to vote and for men who were expected to fight.

Merleau-Ponty and the Ethics of Intersubjectivity

Today's hunting debate began in the eighteenth century, when the idea of the countryside was being invented through the imaginative displacement of agricultural production in favour of country sports and landscape tourism. Between the Game Act of 1671 and its repeal in 1831, writers on walking and hunting often held opposed views, but contributed equally to the origins of modern ecology, while sharing a commitment to trespass that preserved common

rights in an era of growing privatization.

The Making of the English Working Class

"A Comprehensive History of Norwich" by A. D. Bayne. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Politics and Public Policy

Getting beyond the traditional policy cycle discussed in most textbooks, the fully updated fourth edition of *Politics and Public Policy* offers a more comprehensive and realistic view of policymaking in the United States—one that looks beyond the jockeying between presidents and members of Congress, and explores the influence of corporate leaders, interest groups, bureaucrats, judges, and journalists. The book explores six distinct, yet connected, policy domains: Boardroom Politics (decisions by business leaders and professionals); Bureaucratic Politics (rule-making and adjudication by administrators); Cloakroom Politics (lawmaking by legislators); Chief Executive Politics (decision making by presidents, governors, mayors, and their advisers); Courtroom Politics (rulings by

judges); and Living Room Politics (opinions expressed through the mass media, grassroots movements, political activists, and voters). The authors' unique framework prepares students to evaluate the strategies of various political actors within each domain.

The Epidemics of the Middle Ages

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

A Book of Hymns for Public and Private Devotion

This is an up-to-date revision of the classic text first published in 1983. It includes a historical perspective on the growth of evaluation theory and practice and

two comparative analyses of the various alternative perspectives on evaluation. It also includes articles representing the major schools of thought about evaluation written by the leaders who have developed these schools and models. The final section describes and discusses the Standards for Program Evaluation and the reformation of program evaluation.

The Book of Hymns

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. Macready's Reminiscences, and Selections from His Diaries and Letters

Liars for Jesus

How to build a framework for forecasting interest rate market movements With trillions of dollars worth of trades conducted every year in everything from U.S. Treasury bonds to mortgage-backed securities, the U.S. interest rate market is one of the largest fixed income markets in the world. Interest Rate Markets: A Practical Approach to Fixed Income details the typical quantitative tools used to analyze rates markets; the range of fixed income products on the cash side; interest rate movements; and, the derivatives side of the business. Emphasizes the importance of hedging and quantitatively managing risks inherent in interest rate trades Details the common trades which can be used by investors to take views on interest rates in an efficient manner, the methods used to accurately set up these trades, as well as common pitfalls and risks?providing examples from previous market stress events such as 2008 Includes exclusive access to the Interest Rate Markets Web site which includes commonly used calculations and trade construction methods Interest Rate Markets helps readers to understand the structural nature of the rates markets and to develop a framework for thinking about these markets intuitively, rather than focusing on mathematical models

Handy-book of Literary Curiosities

Collecting texts taken from letters, diaries, literature, scientific journals and reports, Pandæmonium gathers a beguiling narrative as it traces the development of the machine age in Britain. Covering the years between 1660 and 1886, it offers a rich tapestry of human experience, from eyewitness reports of the Luddite Riots and the Peterloo Massacre to more intimate accounts of child labour, Utopian communities, the desecration of the natural world, ground-breaking scientific experiments, and the coming of the railways. Humphrey Jennings, co-founder of the Mass Observation movement of the 1930s and acclaimed documentary film-maker, assembled an enthralling narrative of this key period in Britain's national consciousness. The result is a highly original artistic achievement in its own right. Thanks to the efforts of his daughter, Marie-Louise Jennings, Pandæmonium was originally published in 1985, and in 2012 it was the inspiration behind Danny Boyle's electrifying Opening Ceremony for the London Olympic Games. Frank Cottrell Boyce, who wrote the scenario for the ceremony, contributes a revealing new foreword for this edition.

Calamities and Quarrels of Authors

Short term interest rate futures (STIR futures) are one of the largest financial markets in the world. The two main contracts, the Eurodollar and Euribor regularly trade in excess of one trillion dollars and euros of US and European interest rates each day. STIR futures are also unique because their structure encourages spread and strategy trading, offering a risk reward profile incomparable to other financial markets. STIR futures are traded on a completely electronic market place that provides a level playing field, meaning that the individual can compete on exactly the same terms as banks and institutions. The sheer number of trading permutations allows traders to find their own niche. 'Trading STIR Futures' is a handbook to the STIR

futures markets, clearly explaining what they are, how they can be traded, and where the profit opportunities are. The book has been written for aspiring traders and also for experienced traders looking for new markets. This book offers a unique look at a significant but often overlooked financial instrument. By focusing exclusively on this market, the Author provides the reader with a comprehensive guide to trading STIR futures. He covers key points such as how STIR futures are priced, the need to understand what is driving the markets and causing the price action, and provides in-depth detail and trading examples of the intra-contract spread market and cross-market trading opportunities of trading STIR futures against other financial products. An essential read for anyone wishing to enter this market.

The Art of Needle-work, from the Earliest Ages

This book draws on Merleau-Ponty's phenomenology, psychology, neuroscience and Buddhist philosophy to explicate Merleau-Ponty's unwritten ethics. Daly contends that though Merleau-Ponty never developed an ethics per se, there is significant textual evidence that clearly indicates he had the intention to do so. This book highlights the explicit references to ethics that he offers and proposes that these, allied to his ontological commitments, provide the basis for the development of an ethics. In this work Daly shows how Merleau-Ponty's relational ontology, in which the interdependence of self, other and world is affirmed, offers an entirely new approach to ethics. In contrast

to the 'top-down' ethics of norms, obligations and prescriptions, Daly maintains that Merleau-Ponty's ethics is a 'bottom-up' ethics which depends on direct insight into our own intersubjective natures, the 'I' within the 'we' and the 'we' within the 'I'; insight into the real nature of our relation to others and the particularities of the given situation. Merleau-Ponty and the Ethics of Intersubjectivity is an important contribution to the scholarship on the later Merleau-Ponty which will be of interest to graduate students and scholars. Daly offers informed readings of Merleau-Ponty's texts and the overall approach is both scholarly and innovative.

The Blood of Our Sons

A Book of Prefaces

Memoirs of the Court of Queen Elizabeth

The Sterling Bonds and Fixed Income Handbook aims to fill the knowledge gap for sterling-base investors and their advisors. Whilst investors in the equity markets can rely on numerous resources to select stocks and build portfolios, there is little information available for those who wish to buy bonds. This book takes the reader through the key features of gilts and sterling corporate bonds and offers a practical guide to putting money to work in this important and profitable asset class.

Virtual Music

Based on a colloquium held at Stanford University,

Nov. 8-9, 1997.

This book explains what they are, how they can be traded, and where the profit opportunities are.

The Invention of the Countryside

Liars for Jesus debunks many of the historical lies invented and used by the Christian nationalist history revisionists in their efforts to further their far right political agenda and destroy the wall of separation between church and state in America. Liars for Jesus is not a book about religion. It is a history book, presenting and fully documenting the true stories and historical facts that are distorted in the "Christian nation" pseudo-history promoted by the religious right.

Democratic Experiments

"A Book for a Rainy Day; or, Recollections of the Events of the Years 1766-1833" by John Thomas Smith. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of

world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Crossing the Rubicon

Young Charles Lamb 1775-1802

One of the most exciting developments in Romantic studies in the past decade has been the rediscovery and repositioning of women poets as vital and influential members of the Romantic literary community. This is the first volume to focus on women poets of this era and to consider how their historical reception challenges current conceptions of Romanticism. With a broad, revisionist view, the essays examine the poetry these women produced, what the poets thought about themselves and their place in the contemporary literary scene, and what the recovery of their works says about current and past theoretical frameworks. The contributors focus their attention on such poets as Felicia Hemans, Letitia Elizabeth Landon, Charlotte Smith, Anna Barbauld, Mary Lamb, and Fanny Kemble and argue for a significant rethinking of Romanticism as an intellectual and cultural phenomenon. Grounding their consideration of the poets in cultural, social, intellectual, and aesthetic concerns, the authors contest the received wisdom about Romantic poetry,

its authors, its themes, and its audiences. Some of the essays examine the ways in which many of the poets sought to establish stable positions and identities for themselves, while others address the changing nature over time of the reputations of these women poets.
