Opel Ascona and Manta Owner's Workshop Manual

Vespa and Lambretta remain the two most iconic motor scooter brands, even four decades after the latter's demise. But what made them such a European sensation in the postwar era? And why were they particularly popular in Britain in the 1950s and '60s? Motor scooter expert Stuart Owen explains the rise of Innocenti's Lambretta and Piaggio's Vespa, from the wartime ruins of Italy, through years of plenty as the two manufacturers exploited a ready market for affordable, economic transport, and then their decline into more uncertain times as motor cars trespassed on their success. He also explores the rich history of accessorising and customising the scooters, their essential role in the mod movement, and the revival in Vespa's fortunes following the release of the cult film *Quadrophenia*.

The Tigress of Forli

“In this insightful, fascinating portrayal, Elizabeth Lev brings Caterina Sforza and her times very much to

life.”—Kathleen Turner, actress and author of *Send Yourself Roses* A strategist to match Machiavelli; a warrior who stood toe to toe with the Borgias; a wife whose three marriages would end in bloodshed and heartbreak; and a mother determined to maintain her family’s honor, Caterina Riario Sforza de’ Medici was a true Renaissance celebrity, beloved and vilified in equal measure. In this dazzling biography, Elizabeth Lev illuminates her extraordinary life and accomplishments. Raised in the court of Milan and wed at age ten to the pope’s corrupt nephew, Caterina was ensnared in Italy’s political intrigues early in life. After turbulent years in Rome’s papal court, she moved to the Romagna province of Forlì. Following her husband’s assassination, she ruled Italy’s crossroads with iron will, martial strength, political savvy, and an icon’s fashion sense. In finally losing her lands to the Borgia family, she put up a resistance that inspired all of Europe and set the stage for her progeny—including Cosimo de’ Medici—to follow her example to greatness. A rich evocation of Renaissance life, *The Tigress of Forlì* reveals Caterina Riario Sforza as a brilliant and fearless ruler, and a tragic but unbowed figure. “A rich, nuanced portrait of a highly controversial beauty and military leader, and her violent, albeit glittering, Italian Renaissance milieu.”—Publishers Weekly “Well-written and meticulously researched, *The Tigress of Forlì* recreates the world of Renaissance Italy in all its grandeur and violence. At the center stands a remarkable woman, Caterina Riario Sforza. Mother, warrior, and icon, Caterina is unforgettable, and so is the exciting story that Elizabeth Lev tells here.”—Barry Strauss, author of *Masters of*

The Racing Motorcycle

Scooter sales had already peaked in Britain by the mid-1960s - led by the likes of the Lambretta and Vespa. Originally designed as transportation for commuters, the scooter came to be seen more as a vehicle for leisure. Ownership shifted to the younger generation and their appetite for speed and power was insatiable. Shops appeared offering performance tuning services for the first time and a new era of scootering dawned. Production of the Lambretta ceased in 1971 and although Vespa survived, the scooter scene went underground during the 1970s. The passion for tuning continued to flourish however and the release of Quadrophenia inspired a new wave of devotees going into the 1980s. Companies began investing heavily and the introduction of the TS1 cylinder kit for the Lambretta and the T5 Vespa by Piaggio took the tuning scene in a new direction. Now the pure Lambretta and Vespa street racer came to the forefront. Owners were prepared to blow huge budgets and their stunning creations took these machines to a new level. Today there is continued investment from manufacturers and competition is still strong as the Lambretta and Vespa Street racer scene continues to thrive. In *Lambretta & Vespa Street Racers*, author Stuart Owen traces the development of scooter tuning down the decades using dozens of rare period images and highlighting every significant technological milestone along the

way. The different but inseparable stories of both Lambretta and Vespa tuning are told in full with compelling insight and expert knowledge.

The Harley-Davidson Story: Tales from the Archives is a fascinating, visually driven overview of the motor company's rich story, created in cooperation with the Harley-Davidson Museum. The story of Harley-Davidson is a classic American tale of spirit, invention, and the right idea at the right time. From its beginning in a small Milwaukee shed in 1903, William Harley and his cousins, the Davidson brothers, set in motion what would eventually become the world's most iconic motorcycle company. While other

motorcycle companies rose and fell through the teens and 1920s, Harley went from strength to strength, whether introducing its first V-twin motor or dominating race tracks across America. The Milwaukee Miracle even prospered during WWII, building war bikes for the armed forces. By the 1950s, they'd buried their last American-built competitor, Indian, and gained a hold over the US market that they maintain to this day. A remarkable story deserves a remarkable space to recount it. Such is the Harley-Davidson Museum in Milwaukee, which opened in 2009. Harley-Davidson partnered with Motorbooks to create this book relaying Harley-Davidson's story, as told through the museum's displays and archive assets.

Geography of the Gaze offers a new history and theory of how the way we look at things influences what we see. Focusing on Western Europe from the seventeenth to nineteenth centuries, Renzo Dubbini shows how developments in science, art, mapping, and visual epistemology affected the ways natural and artificial landscapes were perceived and portrayed. He begins with the idea of the "view," explaining its role in the invention of landscape painting and in the definition of landscape as a cultural space. Among other topics, Dubbini explores how the descriptive and pictorial techniques used in mariners' charts, view-oriented atlases, military cartography, and garden design were linked to the

proliferation of highly realistic paintings of landscapes and city scenes; how the "picturesque" system for defining and composing landscapes affected not just art but also archaeology and engineering; and how the ever-changing modern cityscapes inspired new ways of seeing and representing the urban scene in Impressionist painting, photography, and stereoscopy. A marvelous history of viewing, *Geography of the Gaze* will interest everyone from scientists to artists.

Scooterboys are the lost tribe of British youth culture. Unrecognised, uncelebrated and unwanted; misunderstood by a general public who mistook us for Mods. We weren't Mods though. By the 1980s myself and tens of thousands of scooter riders collectively rejected that label. Instead, we took the roadmap of British youth disaffection and carved a new bypass.

This route took us beyond the UK's faded seaside resorts, allowing us to spread our creed across the continents. Tuned and customised Vespa and Lambretta scooters gave us freedom to roam; transport to live for the weekend. Shared experiences of riots, local hostility and police harassment built strong fraternal bonds that endure to this day. Despite decades of two-wheeled rebellion our threat level was never high enough to put us on the national security radar. This low profile has its benefits. We aren't doomed to follow the same cycle as Mods. First feared, then pilloried, accepted and finally adopted as part of UK's rich culture. As British as a vindaloo. The cult of Scooterboy has escaped death-by-public-acceptance, simply by remaining too underground. Too difficult to distinguish from what came before. And that's just perfect. You'll never see Scooterboys parodied in TV insurance adverts or low budget fly-on-the-walls. The poorly-rendered caricature is always some cliché Mod on a 'Christmas Tree' scooter. If you rode to rallies in the 80s and 90s then this book will mirror your experiences. If you've never had a scooter then it offers a rare glimpse of life inside the lost tribe of two-stroke terrorists.

The Little Book of Trikes

A faithful reproduction of the 1970 Floyd Clymer publication of the official Honda Factory Workshop Manual specific to the n00 50cc Super Cub series of motorcycles. This manual includes all of the data that you would expect from a factory publication for the repair and overhaul of all major and minor mechanical

and electrical components. It also includes a comprehensive trouble shooting section plus tables of technical data, tolerances and fits making it an invaluable resource for collectors and restorers of these classic Honda motorcycles. There are 136 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from Japanese to English is, at times, a little quirky but the illustrations make up for any difficulty in understanding what needs to be done! There are separate sections that deal with the repair and overhaul procedures for the engine, transmission, wheels and brakes, front forks, frame and carburetor, plus a detailed electrical service section. This is a - must have - reference for any Honda enthusiast and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of these classic motorcycles. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide.
