Notes on books

Eighteenth-century Russia

The Illustrated Handbook of Succulent Plants represents the first comprehensive taxonomic treatment of succulents in thirty years. It covers over 9000 taxa of all succulents except Cactaceae. This volume on the Asclepiadaceae (milkweed family) presents all kinds of succulent plants from geophytic Raphionacme, leaf succulent

Hoyato stem succulent Cynanchumand, of course, the popular stapeliads (carrion flowers). A total of 1119 species are included; of the 70 genera treated, 49 are covered in their entirety. The most species-rich assemblages are Ceropegia(lantern flowers) and Brachystelma. For the latter a complete generic treatment is presented for the first time. The handbook is devoted to a family famous for their outstandingly complex and beautiful flowers and is illustrated with 332 superb colour photos. Keys to genera are provided; for all accepted taxa, descriptions including typification and distributional data, full synonymy and literature references are given.

The Asclepiad

Horace's Odes are among the most popular, and the most misunderstood, of ancient writings. The present work is written in the belief that they are learned poems, which demand some knowledge of conventional forms and topics. Each ode is provided with an introduction which sets it against its Greek and Roman literary background. This edition may be used in conjunction with the Oxford Classical Text edited by E. C. Wickham. The commentary includes a large number of parallel passages, chosen to show how Horace plays new variations on old themes; it is hoped that these may prove useful to commentators on other ancient poets. The book also contains sections on chronology and metre, and a select bibliography is attached to each ode.

Horatius Restitutus: Or, The Books of Horace Arranged in Chronological Order According to the Scheme of Dr. Bentley

Year-book of the Royal Society of London

Handbook of Asclepiads of Thailand

This volume brings together forty papers from the Study Group's very successful international conference held in Wittenberg in 2004. The contributors include scholars from Russia, Britain, Germany, Italy and the US: papers are written in English and in Russian. Topics range widely over the life of the Empire and its emerging modern society, institutions and discourses. The volume brings together new research on literature and its social context, on cultural models and reception,

on social groups and individuals, on history, law and economy: it offers an exciting interdisciplinary insight into Imperial Russia in the 'long' eighteenth century.
