Legal Research and Law Library Management

Anerkanntermaßen stellt das Konzept des Knowledge Management einen entscheidenden Gewinn für den Informationsprofi dar. Management-Theorien betonen immer die wichtige Rolle von Bibliotheken und Bibliothekare in der Praxis von Organisationen (Unternehmen, Städte aber auch die gesamte Gesellschaft). Die in diesem Band enthaltenen Beiträge demonstrieren dies aus der Sicht der Bibliotheken. In diesen Beiträgen werden grundlegende Implikationen des Knowledge Management als zentralem Arbeitsfeld in Bibliotheken diskutiert, Grundsatzfragen und Methoden analysiert und praktische Beispiele untersucht. Unter den Autoren finden sich beispielsweise Larry Prusak, James Matarazzo, Michael Koenig, Rafael Capurro, Susan Henczel, Irene Wormell und Rainer Kuhlen. Das Buch vereint 18 wichtige Texte zum Thema: z. B. aus IFLA-Workshops und -Konferenzen, aber auch aus anderen Quellen, wie beispielsweise der SLA (Special Libraries Association).

Library Management and Marketing in a Multicultural World

Experts explore the latest and most successful techniques in library management, offering fresh insights and practical guidelines.

Libraries in the Twenty-First Century

Examine the nuts and bolts of successful management in today's rapidly evolving libraries! This book is an essential primer for new library managers and directors. In addition to providing an overview of the practical aspects of management, it is a vital reference tool for managing your library and its staff. The Practical Library Manager's informative text and comprehensive bibliographies of print and electronic resources can guide you to solutions to the issues that every fledgling library manager must deal with upon appointment. While there are many publications on library management, The Practical Library Manager is one of very few to focus on the practical issues of staffing and the importance of continuous staff training. Also, unlike other books on the subject, this book features a chapter that points you to relevant management texts originally written for the corporate world rather than the library profession. The Practical Library Manager is the perfect single source to help you: understand the challenges of staffing your library and training your staff explore new technology's impact on library workers and evaluate training programs to help them keep up ensure that your staff has the core competencies they'll need in the current climate build a "virtual library" decide whether your library should join a consortium and much more! In the words of the author: "Today, the most successful libraries in the country are those addressing the needs of both external and internal customers. However, it takes more than technology to change the working relationship between the institution and its customer. The guiding force for change must include a strong and respectful relationship between the library manager and staff. Much of what is written in this book can assist the fledgling manager in creating an environment of trust, teamwork, and respect."

Creating the Agile Library

Explains how to implement new school library standards and demystify changes resulting from technology, discusses budgeting and special needs of children, and includes ten conceptual plans for actual school libraries.

Studies in Library Management

"Included are insights from working library managers at different levels and in various types of libraries, addressing a wide range of management issues and situations. Not to be missed: comments from library staff about the qualities they appreciate - and the styles and attitudes they find counterproductive - in their own bosses."--Jacket.

Fundamentals of Collection Development and Management

Is the traditional library business model a victim of disruptive digital technologies? Library Management in Disruptive Times

identifies the key skills and attitudes needed by the library leaders of today and tomorrow and delivers a balanced view of the future of the profession. Contributed to by expert professional library leaders and educators from across the globe, this edited collection offers thought-provoking perspectives on the challenge of the current operating environment across a range of library sectors, library professional associations and geographic regions. Each author brings their own particular area of expertise and perspective on to consider the effects of disruptive change in libraries globally. Key topics covered include: - Leading change - Management fads and their impact on libraries - User engagement - The value of collaboration and consortia - Library management and the global economic crisis - Agile management techniques - The role of professional associations in redefining the profession - Developing management skills on the job - Planning for the future. This dynamic collection helps readers to envision the purpose and value of future libraries and to see change as a rare opportunity to create truly new roles for librarians. Readership: This will be essential reading for library managers, directors and aspiring leaders throughout the world.

The Accidental Library Manager

This updated edition of the renowned library management textbook provides a comprehensive overview of the techniques needed to effectively manage a contemporary library or information center.

Excellence in Library Management

Digital libraries have been established worldwide to make information more readily available, and this innovation has changed the way information seekers interact with the data they are collecting. Faced with decentralized, heterogeneous sources, these users must be familiarized with high-level search activities in order to sift through large amounts of data. Information Seeking Behavior and Challenges in Digital Libraries addresses the problems of usability and search optimization in digital libraries. With topics addressing all aspects of information seeking activity, the research found in this book provides insight into library user experiences and human-computer interaction when searching online databases of all types. This book addresses the challenges faced by professionals in information management, librarians, developers, students of library science, and policy makers.

Library and Information Center Management, 8th Edition

Libraries in the Twenty-First Century brings together library educators and practitioners to provide a scholarly yet accessible overview of library and information management and the challenges that the twenty-first century offers the information profession. The papers in this collection illustrate the changing nature of the library as it evolves into its twenty-

first century manifestation. The national libraries of Australia and New Zealand, for instance, have harnessed information and communication technologies to create institutions that are far more national, even democratic, in terms of delivery of service and sheer presence than their print-based predecessors. Aimed at practitioners and students alike, this publication covers specific types of library and information agencies, discusses specific aspects of library and information management and places developments in library and information services in a number of broad contexts: socio-economic, ethico-legal, historical and educational.

School Library Management, 7th Edition

An essential reference for professionals within the Library and Information Science field, this book provides library managers with the requisite skills to utilize the case study approach as an effective method for problem solving and deliberation. The first chapter discusses the case study as a research tool. The second chapter outlines the processes involved in conducting a case study. An actual case model is presented in the third chapter. The succeeding chapters include case studies written by library management students at Valdosta State University in the USA. The chapters include discussion questions, analyses, and alternative scenarios to provoke further thought and discussion. Written from a practitioners perspective Draws on the authors wide-ranging practical experience as a library director Guides the reader though the case study process

Intellectual Freedom Manual

A must-have guide of professional development resources for library staff at every phase of their career—from those just entering the field, to paraprofessionals building a career trajectory, to seasoned librarians looking to explore additional career options. * A career lifecycle approach to building a career in the library and information sciences field * Practical guidance and resources for every stage of a career * Resource annotations detail the importance of a particular source * A comprehensive list of resources for further reading

Human Resource Management in Today's Academic Library

"The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes. This thorough reference set--written by 1300 eminent, international experts--offers librarians, information/computer scientists, bibliographers, documentalists, systems analysts, and students, convenient access to the techniques and tools of both library and information science. Impeccably researched, cross referenced, alphabetized by subject, and generously illustrated, the Encyclopedia of Library and Information Science integrates the essential theoretical

and practical information accumulating in this rapidly growing field."

Computer in Library Management

This book provides library managers with essential information about establishing and maintaining a compensation system that meets the needs of library employees and furthers organizational goals.

Library Management in Electronic Environment

An eminent sociologist and bestselling author offers an inspiring blueprint for rebuilding a fractured society. "Comprehensive, entertaining, and compellingÉ"--Jon Stewart. A New York Times Book Review Editors' Choice.s' Choice.

School Library Management: Just the Basics

This valuable resource gathers the principles and best practices of leadership, and points the way towards creating a service culture that makes every staff member a library leader.

Inherent Strategies in Library Management

The Facet Library Management Collection

As a comprehensive introduction for LIS students, a primer for experienced librarians with new collection development and management responsibilities, and a handy reference resource for practitioners as they go about their day-to-day work, the value and usefulness of this book remain unequaled.

The Practical Library Manager

Over the years many of the libraries have become large and complex organisations presenting a challenge to a librarian. Managing a large library is a highly specialised and complicated job. Due to changing environment, especially technological one, his job has become very challenging. A librarian in such an environment should have a managerial ability of a high order, and possess different kinds of skills including technical skills in the application of information technology with adequate knowledge to solve multidimensional problems. Keeping in view, the requirements of students of library and

information science, the book presents a framework of basic knowledge of management in electronic environment. Emphasis has been laid on basic issues and concepts of management. Principles of management and theories of management have been explained. Library routines have been described adequately, keeping in view the application of information technology.

Managing the One-Person Library

The Library Compensation Handbook

The first of its kind, this readable, hands-on book will help you to see your library and the staff that runs it in a new, more strategic way. Experienced librarian and coach Ruth Metz outlines a focused and results-oriented game plan for achieving performance excellence from all staff members, from top to bottom, through a coaching style of management. By viewing the people you work with as a team, you can transform the work environment and, ultimately, the services you are providing your customers. Through real world examples, coaching scenarios, and pathways to excellence that are specific to library work, you will learn how to: Be both a coach and a player - the terminology and techniques; Recognize and utilize the abilities and talents of staff at all levels; Guide individuals toward a unified goal; Encourage innovation, flexibility, and problem-solving; Spotlight the big-win opportunities; Complete with reader-friendly tables and annotated references, Coaching in the Library is for any library that wants to put the potential of all staff on the playing field in order to achieve peak performance.

Law Library Management During Fiscal Austerity

Mistakes in Academic Library Management: Grievous Errors and How to Avoid Them addresses the most common library management issues, examining mistakes that anyone in a library management position could make, coupled with suggestions for how the issue could be better handled or avoided. The result is the recognition and formation of tools to aid developing managers in identifying potential pitfalls. Jack E. Fritts Jr. addresses a range of management issues, including campus politics, communication, information technology, staff, and planning. There is also a chapter that addresses library management from the perspective of a chief academic officer. All those in library management positions, or who aspire to library management positions, will profit from the discussions of common but potentially severe mistakes in library management presented in this book.

Studies in Library Management

Part I: General systems theory and the organisation of libraries; Consultancy, systems engineering and libraries senior consultant, aslib; Some management techniques in a London library; Operational research in libraries; Part II: The impact of non-print materials on library administration; Library public relations: an introduction; Some human problems of decentralisation; Education for library administrators.

Knowledge Management

Coaching in the Library

Web 2.0 first created a scramble among librarians to participate in Facebook, YouTube, blogs, and other social media applications, and the turn is now towards management and consolidation. *Managing Social Media in Libraries* explores the developing information environment, the collaboration among library organizations, and the ways social media may convert the loose connections between library staff members. The book takes librarians beyond the mechanics of using social media, and establishes a framework to move library managers and leaders toward making social media effective. *Managing Social Media in Libraries* is structured around key topics in this area, including: refocusing after the first use of Web 2.0; library organisations as loosely coupled systems; social media within such systems; defining a purpose for the use of social media; connecting messages and tools; and integrating social media into standard websites. Provides practical ways of thinking about social media for library managers and leaders Provides examples of policies, workflows, and uses of social media tools for library managers and leaders Defines organizations as coordinated systems and discusses how social media tools can emphasize the benefits of coordination

Studies in Library Management

Written in clear, simple language, this book provides information that will help an aide or paraprofessional manage a school library. • Illustrations by the authors • An index enables easy searching

The Accidental Library Manager

The successful transformation of today's library into the library of the future is dependent upon its ability to be agile and to change to meet users' needs and expectations.

School Library Management

Change in libraries -- The human factor -- Organizational culture impact -- Initiating change effectively -- Implementing change effectively -- Environmental factors impacting success -- Managerial baggage -- Evaluating the change and yourself as a change leader -- Change-specific challenges.

Managing Social Media in Libraries

Provides a comprehensive look at issues that shape the nature of Human Resources in academic libraries.

Information Seeking Behavior and Challenges in Digital Libraries

Library Management

The Facet Library Management Collection provides cutting-edge information on and practical guidance on library management for the library leaders of today and tomorrow. The ten books included in the Collection are, 1) Library Management in Disruptive Times: Skills and knowledge for an uncertain future, edited by Steve O'Connor; 2) Leading Libraries: How to create a service culture by Wyoma vanDuinkerken and Wendi Arant Kaspar; 3) Management Basics for Information Professionals, 3rd edition by G. Edward Evans and Camila Alire; 4) Assessing Service Quality: Satisfying the expectations of library customers, 3rd edition by Peter Herson, Ellen Altman and Robert E. Dugan; 5) Being an Information Innovator by Jennifer Rowley; 6) Leadership: The challenge for the information profession by Sue Roberts and Jennifer Rowley; 7) Managing Information Services by Sue Roberts and Jennifer Rowley; 8) Supervising and Leading Teams in ILS by Barbara Allan; 9) Project Management: Tools and techniques for today's ILS professional by Barbara Allan; 10) Managing Stress and Conflict in Libraries by Sheila Pantry.

Leading Libraries

Managing the one-person library provides a useful and needed resource for solo librarians confronted with the challenges of running a small library. The author uniquely focuses on topics encountered by solo librarians, such as IT troubleshooting and library security. Chapters on library management, collection development, serials management, and library marketing are included to enable solo librarians to easily manage day-to-day operations in these areas, and advise on how to respond to any challenges that should (and will) arise. This book will provide a much-needed resource manual that will allow solo

librarians of all backgrounds, and paraprofessionals, to manage their collections as effectively as their larger librarian counterparts. Written by a librarian with extensive solo library management in the field Targeted to all types of solo librarians (e.g., medical, law, academic) Essential reading for paraprofessional librarians who manage one-person libraries

Palaces for the People

Encyclopedia of Library and Information Science

Written in clear, simple language, this book provides information that will help an aide or paraprofessional manage a school library. * Illustrations by the authors * An index enables easy searching

Library Management in Disruptive Times

"Included are insights from working library managers at different levels and in various types of libraries, addressing a wide range of management issues and situations. Not to be missed: comments from library staff about the qualities they appreciate - and the styles and attitudes they find counterproductive - in their own bosses."--Jacket.

Library Management

Inherent Strategies in Library Management describes general and specific strategies for libraries based on core library values, and does so through concrete research. Many strategic management books for libraries introduce concepts of business management to the library world, but often neglect traditional library culture and core values. This book reexamines management through the lens of libraries themselves, rather than relying on strategies borrowed from the business world, in an attempt to bring to light the factors and decision-making processes behind how librarians have run their libraries over the past fifty decades. In other words, their decisions can be regarded as inherent management, born naturally from the core foundations, considerations, and operations of libraries. In addition, this book investigates the broad influences of business management theories on libraries, including a discussion on the advantages and disadvantages of their use. Presents management strategies for libraries based on core library values Provides detailed analysis on the effects of business management theories on libraries Lays down the fundamental rules for managing libraries Explains various management analysis methods Bridges the gap between library core values and business efficiency

Designing a School Library Media Center for the Future

Written from the perspective of a librarian, this book offers a comprehensive overview of the impact of e-books on academic libraries. The author discusses advantages to both researchers and librarians and provides current examples of innovative uses of e-books in academic contexts. This book reviews the current situation in e-book publishing, and describes problems in managing e-books in libraries caused by the variety of purchase models and varying formats available, and the lack of standardisation. It discusses solutions for providing access and maintaining bibliographic control, looks at various initiatives to publicise and promote e-books, and compares e-book usage surveys to track changes in user preferences and behaviour over the last decade. E-books have already had a huge impact on academic libraries, and major advances in technology will bring further changes. There is a need for collaboration between libraries and publishers. The book concludes with reflections on the future of e-books in academic libraries. Describes how e-books have changed library services and how they have enabled academic libraries to align with the e-learning initiatives of their universities Discusses problems with e-book collection development and management and lists examples of solutions Examines trends in user behaviour and acceptance of e-books

LIS Career Sourcebook

E-books in Academic Libraries

The Challenge of Library Management

The papers collected in this volume were presented at the conference entitled "Library Management and Marketing in a Multicultural World" in Shanghai, China from August 16-17, 2006, held under the auspices of the Marketing and Management Section of the International Federation of Library Associations (IFLA). This book addresses some of the latest developments in the marketing and management of libraries worldwide, recognizing the challenges to meet local needs in a global, information society. The authors used different approaches to identify trends, opportunities and needs as well as effectiveness and assessment in countries ranging from Australia, Belgium, China, Denmark, Greece, India, Pakistan, Spain, the United States and elsewhere throughout the world. Several authors describe successful programs designed to promote libraries within a community, nation, or academic community. Others report on trends and changes taking place within the user community and present case studies on the response of libraries to meet challenges and opportunities - through marketing and management.

Mistakes in Academic Library Management

This book compiles selected articles from Library Media Connection to help school librarians and pre-service librarians learn about how to implement best practices for school library management. • An outstanding LIS textbook that addresses the latest standards, guidelines, and technologicis for the field and offers a blueprint for developing a strong school library program • A comprehensive listing of resources that includes websites, blogs, videos, and books • Articles written by distinguished practitioners and industry icons • Suggestions for using new technologies to achieve learning outcomes • A compilation of the most useful articles from Library Media Connection
