### **New Frontiers in Marine Tourism**

### **Rosabeth Moss Kanter on the Frontiers of Management**

Policy-relevant economic research on health care and health policy issues.

### **The Frontiers of Project Management Research**

Leading economists discuss current health policy challenges, including prescription drugs benefits as a component of Medicare and conversion to for-profit health plans.

### **Rosabeth Moss Kanter on the Frontiers of Management**

In this ebook, a collection of 18 papers presents empirical research, as well as novel theoretical considerations, on how multiple identities are being managed by the individuals holding them. The papers draw on theories from social psychology in the context of the social identity approach. The first chapter presents eight papers on different types of multiple identity configurations in a variety of contexts, and the costs and benefits of these configurations for the individual (e.g., well-being). The second chapter gives insights on how conflict between multiple identities is managed by individuals. And the final chapter analyses how multiple identities impact intragroup and intergroup relations.

### **Integrating Emerging Technologies into Marine Megafauna Conservation Management**

The book presents the state-of-the art in urban wa

### **Rosabeth Moss Kanter on the Frontiers of Management**

Coastal eutrophication has been and still remains an important issue for the scientific community. Despite many efforts to mitigate coastal eutrophication, the problems associated with eutrophication are still far from being solved. This book focusses on the most recent scientific results in relation to specific eutrophication issues, e.g. definition(s) and causes; nutrient loads, cycling and limitation; reference conditions, primary effects and secondary effects; trend reversal (oligotrophication), as well as links to other pressures (climate change and top/down control). It also focusses on monitoring and modelling of coastal eutrophication, and adaptive and science-based nutrient management strategies. The book is based on selected papers from the Second International Symposium on Research and Management of Eutrophication in Coastal Ecosystems, held 20-23 June 2006 in Nyborg, Denmark.

### **Vibrionaceae Diversity, Multidrug Resistant and Management**

The Frontiers of Management offers stimulating and profitable reading for both existing Drucker disciples and those new to his writing. This collection of thirty-five finely balanced articles and essays, plus an interview and afterword, was planned by the author from the beginning to be published eventually in one volume and as variations on one unifying theme - the challenges of tomorrow that face the executive today. What kind of tomorrow it will be depends heavily on the knowledge, insight, foresight and competence of the decision makers of today. The future is in the hands of executives who are already fully occupied with the daily crisis, and for whom the daily crisis is the one absolutely predictable event in their working day. It is to these people that this Drucker volume is addressed, to enable them to see and to understand the long-range implications and impacts of their immediate, everyday, urgent actions and decisions.

## **Expanding the Frontiers of Irrigation Management Research**

Research results: performances assessment; Research results: design and operation of irrigation systems; Research results: policy, institutions, and management; Research results: health and environment; Training and institutional strengthening; Conclusions: outputs, impacts, and future directions.

## **Application of Neural Technology to Neuro-Management and Neuro-Marketing**

This book collates the main research developments around Lean Construction over the past 25 years with contributions from many seminal authors in the field. It takes stock of developments since the publication of Koskela's (1992) Application of the New Production Philosophy to Construction and, in doing so, challenges current thinking and progress. It also crystallises theoretical conceptualisations and practically situated learning whilst identifying future research challenges, agendas and opportunities for global collaborative actions. The contributors present the development of Lean Construction as a fundamental part of improving construction productivity, quality and delivery of value to clients and users of built infrastructure. In doing so, the book introduces the reader to the foundational principles and theories that have influenced the way we now understand Lean Construction and has provided very useful insights to students, practitioners and researchers on key junctures over the last 25 years. Highlighting the key contemporary developments and using global case study material the chapters demonstrate good practice but also help introduce new thinking to both lay readers and experienced practitioners alike. This book is essential reading for undergraduate and postgraduate students, researchers and practitioners with an interest in Lean Construction and construction management, providing a general understanding of the area, current state of the art knowledge as well as providing an insight into areas for future research.

## **Active Aging and Disease Management**

This book introduces predictive analytics in sports and discusses the relationship between analytics and algorithms and statistics. It defines sports data to be used and explains why the unique nature of sports would make analytics useful. The book also explains why the proper use of predictive analytics includes knowing what they are incapable of doing as well as the role of predictive analytics in the bigger picture of sports entrepreneurship, innovation, and technology. The book looks at the mathematical foundations that enhance technical knowledge of predictive models and illustrates through practical, insightful cases that will help to empower readers to build and deploy their own analytic methodologies. This book targets readers who already have working knowledge of location, dispersion, and distribution statistics, bivariate relationships (scatter plots and correlation coefficients), and statistical significance testing and is a reliable, well-rounded reference for furthering their knowledge of predictive analytics in sports.

## **New Directions in the Management of Status Epilepticus**

This volume describes and analyses current efforts to restructure and modernize the public sector in some OECD countries. Transformational trends are examined quantitatively and comparatively. Case studies focus on both centralized government ministries and on regional authorities. By providing detailed empirical information on a variety of policy areas, this study also teaches practical lessons for policy implementation. The relevant issues of public sector modernization are carefully considered.

## **Frontiers in Urban Water Management**

This book is devoted to game theory and its applications to environmental problems, economics, and management. It collects contributions originating from the 12th International Conference on "Game Theory and Management" 2018 (GTM2018) held at Saint Petersburg State University, Russia, from 27 to 29 June 2018.

## **Multiple Identities Management**

"Through numerous examples from his some twenty-five years as an educator and consultant, Raelin illustrates how to learn collectively with colleagues who also wish to grow professionally."--Jacket.

## **Work-based Learning**

'New Frontiers in Marine Tourism' is the first book of this kind to address and analyse this burgeoning tourism sector comprehensively. By integrating aspects such as the sustainability, safety, education, experiences and management of diving tourism the text highlights a variety of pressing topics related to the management of diving tourism, including: \* different types of diving locations and their particular characteristics and the geographical distribution of dive locations \* the growth and economic significance of diving tourism in destinations worldwide \* different motivations and typologies of diving tourists, their learning behaviour, knowledge of marine environments, and their interaction with flora and fauna. \* diver satisfaction, attitudes and preferences, education and interpretation, and compliance with regulations \* environmental impacts, and aspects of risk and health.

## **Japanese Management**

## **The Frontiers of Management**

Global Leadership Talent Management, as an integrated process, supports the sustainable success of global organizations. This book shows how specifically the selection process can be created as an exchange process in which mutual expectations and perceived fairness and justice play an important role.

## **Neuroscientific Research for Management of Dementia**

This book provides a new understanding of the constellations of logics in Japanese management practices in Asia and the West. Through comparative ethnographic case studies in a Japanese multinational corporation (MNC), the book explores the cultural meanings of family, corporation, market and religion logics at each subsidiary's site in Thailand, Taiwan, Belgium and the United States. In doing so, the book defines cultural space through an institutional logic approach. It argues that logics are culturally interpreted, which can impose a serious limitation on the institutional logic approach based on the analysis of Western society. It reveals that Japanese 'family' logics and Theravada Buddhism in Asia are strengthening each other and this directly supports the presupposition of amplification. It further elaborates on the ongoing constellations of logics that are continuously formed in relation to geographical contexts. The book also explains that the boundaries of organisational communities are not automatically formed by Japanese expatriates but constructed through actors' profiles, which, in turn, raises their importance. Therefore, this book is a must-read for researchers, managers and anyone interested in Japanese MNCs.

## **The Frontiers of Management Psychology**

## **Statistical Modelling and Sports Business Analytics**

Rosabeth Moss Kanter is a leading management thinker from the Harvard Business School. This book gathers her pioneering work into one volume, and offers fresh insights on how managers can build change-adept organisations.

## **Frontiers in Health Policy Research**

Despite the significance and prevalence of errors in organizations, there has been no attempt within the field of Industrial and Organizational Psychology to create a single source summarizing what we know regarding errors in organizations and providing a focused effort toward identifying future directions of research. This volume answers that need and provides

contributions by researchers who have conducted a considerable amount of research on errors occurring in the work context. Students, academics and practitioners in a wide range of disciplines, i.e., industrial organizational psychology, medicine, aviation, human factors and systems engineering, will find this book of interest.

### **Frontiers of Contemporary Management**

Offers advice on business strategy, innovation, customer service, world trends, managing change, strategic partnerships, compensation, and social responsibility

### **Frontiers of Dynamic Games**

Population aging and the associated burden of chronic diseases are one of the main challenges in public health worldwide. This Research Topic on "Active Aging and Disease Management" provides a comprehensive overview of population aging through fourteen comprehensive papers. Chapter 1 discusses an overview of health systems in active and healthy aging, while Chapter 2 focuses on the role of lifestyles, exercise and new technologies. Chapter 3 debates psychological and cognitive issues in aging and finally in Chapter 4, an older people self assessment is proposed and the role of communities and supporters are highlighted. We think that real social and health care integration at community level could be the key point to deliver effective health promotion and preventive intervention. Enjoy the reading!

### **Eutrophication in Coastal Ecosystems**

For specialists and nonspecialists alike, this perceptive selection of the newest and the up and coming tools and techniques of competitive intelligence picks up where other books leave off, offering a well balanced combination of theory and practice. It shows how advances in computers and technology have accelerated progress in CI management, and the ways in which CI has affected (and been affected by) major business functions and processes. It explores applications to organizations of various sizes and types. Analysts, strategists and organizational decision makers will find the book especially valuable, as they seek to make sense of the business environment and assess their organizations' evolving, dynamic places in it.

### **Frontiers of Risk Management**

Bovine tuberculosis (bTB) is a significant zoonotic pathogen with a global distribution, and a considerable economic impact. It has a notoriously complex epidemiology, varying by affected region and often involving multiple-host species. Here we

present an international collection of papers that address both national and international factors impacting on the control of bovine tuberculosis. We hope this Research Topic will provide a forum which may generate a greater understanding of the disease in a wider context, and inform future eradication efforts through the design of more effective interventions.

### **Mapping the Cyberbiosecurity Enterprise**

Vibrio are Gram-negative bacteria that naturally inhabit riverine, estuarine and marine aquatic environments. Some Vibrio are known to be capable of causing gastroenteritis, wound infections, cholera and fatal septicemia in severe cases. Over the past decades, research on Vibrio has increased and has caused a great development in our knowledge of these pathogens. Focus of this research includes the discovery of emerging epidemic clones, the traits of new strains, and the occurrence of multidrug resistant strains in the ecology. Moreover, improved understandings of the prevalence, pathogenesis and evolution of Vibrio have revealed the significant role of these pathogens in enhancing disease transmission. The complete genomic sequences of Vibrio have been determined in providing a rich set of data illuminating the metabolic versatility of the species. This book is dedicated to improving our knowledge and understanding, not solely focusing into the prevalence, detection, pathogenesis, virulence, pandemic clones and multidrug resistance, but also looking at the management of the multidrug resistance through different strategies such as non-antibiotic resistant strategies that involved the application of knowledge in bacteriophages.

### **Cross-cultural Challenges in International Management**

Japanese Management in Evolution illustrates the significant changes that have been taking place in Japanese business by focusing on "emerging industries" in the relatively neglected service and "creative" sectors as well as other key industries, and to put those changes in historical perspective by providing an overview of business development since World War II. By employing state-of-the-art research techniques and unconventional innovative approaches in analysing Japanese management - including network and discourse analysis, ethnographic explorations, and more - the book reveals historical developments and in-depth analyses of established and emerging composition of sectors and industries where cultural capital matters. Throughout the book, the common theme conveyed to readers is a consistently strong message that the change is ongoing and the evolution of management style is real in the Japanese context. The book would be of great interest to researchers, academics and practitioners in fields of global management, international management, and Asian capitalism.

### **Frontiers in Health Policy Research**

The articles in this eBook are divided into three main chapters. Chapter 1 focuses on the role of specific proteins in the pathological processes of neurodegeneration, specifically Alzheimer's disease. Chapter 2 describes novel candidates and risk factors for the diagnosis of Alzheimer's disease. Chapter 3 targets various therapeutic interventions from pharmacological targets to cognitive function. This eBook thus provides an overall overview of the latest research in understanding mechanisms leading to the development of Alzheimer's disease, diagnosis, and therapeutic interventions.

### **New Frontiers in Public Sector Management**

This edited collection, first published in 1989, stems from the second annual meeting of the British Academy of Management, held at Cardiff Business School in 1988. With the focus on important areas of change affecting management practice and theory – in markets, technology and organizational structure – this volume contains a selection of material presented at the conference by leading scholars in the field. Their contributions provide multi-disciplinary views of organizational strategy, across a wide spectrum of business and industry, which will be of significant interest to any students of business structure and management.

### **Japanese Management in Evolution**

This volume in SIOP's Organizational Frontiers Series is a state-of-the-art overview of contemporary conflict research which aims to place conflict research and theory squarely within the realm of industrial and organizational psychology. This volume brings together and integrates classic and contemporary insight in conflict origins, conflict processes, and conflict consequences. In addition, it stimulates modeling conflict at work at relevant levels of analyses: the interpersonal and group, and the organizational. It is appropriate for scholars and practitioners in the areas of industrial-organizational psychology, human resource management, organizational behavior, applied psychology, and social psychology.

### **Bovine Tuberculosis - International Perspectives on Epidemiology and Management**

This biography traces the adult life, works and relationships of the Taylorist, Walter Polakov, focusing on his socialist scientific management, his ideals and dreams, and how these were constrained by conventionality in the USA in the first half of the twentieth century.

### **IBD Management - Novel Targets and Therapeutic Perspectives**

Looking at the entire spectrum of financial services risk management, this practical guide identifies the key current issues

and the solutions adopted by firms.

### **Managing Frontiers in Competitive Intelligence**

This reader-friendly book attempts to comprehend all the scattered and diverse understandings of Contemporary Management Thought in a systematic and structured manner into a nutshell. It will enable the reader to take a leap jump to the current frontiers of the turbulent and dynamic business world today. The first chapter comprises an in-depth analysis of the four parameters that govern modern business; Uncertainty, Ambiguity, Paradox and Chaos. Despite the fact that business executives fear and resent to deal with such realities, exponential financial gains can be made within very short periods by exploring the enormous business potential and emerging opportunities associated with them. The second chapter deals with the significance of knowledge in modern management with numerous value additions, supplemented by examples. The third chapter on Paradigms, a buzzword in modern management, encapsulates all the existing concepts with a new philosophical interpretation. Also, it highlights the missed opportunities owing to paradigm shifts and paradigm blindness and the need to redefine the corporate mission from an end-use perspective, rather than from the conventional end-user perspective. The fourth chapter identifies a global process error and summarizes the entire industrial revolution from a strategy evolution and transformation perspective.

### **The Psychology of Conflict and Conflict Management in Organizations**

\* Kanter is highly respected as a management scholar and thinker \* Gathers all of Kanter's pioneering work for HBR into one volume \* Provides Kanter's own perspective on her seminal works over the last 15 years \* The market is craving classic and authoritative ideas from a well respected scholar and practitioner. This book will feed that hunger. \* Enforces a single, timeless message: the importance of treating people as assets, not costs, and providing the tools and conditions that liberate people to use their brainpower to make a difference. \* 20,000 copies sold in hardcover.

### **The Red Taylorist**

This edited book is a compilation of research studies conducted in the areas of business, management and economics. These cutting-edge articles will be of interest to researchers, academics, and business managers.

### **Frontiers of Business, Management and Economics**

Status Epilepticus (SE) is a neurological emergency and has high morbidity and mortality. The International League Against

Epilepsy (ILAE) recently updated their definition to specify that, “SE is a condition resulting either from the failure of the mechanisms responsible for seizure termination or from the initiation of mechanisms, which lead to abnormally, prolonged seizures.” Such phenomena can lead to long-term neurological complications due to neuronal death, glia, neurological injury, aberrant neuroplasticity, oxidative stress and inflammation, and alteration of neuronal networks. Depending upon the type and duration of SE, these mechanisms are quite variable. Therefore, in response to the updated definition of SE, novel avenues of research are required to address the specified involvement of the underlying mechanisms and pathophysiology resulting in the development of and outcomes from SE. Improving the basic science understanding of SE will facilitate essential clinical trials. One can envision such experiments to include device and compound-based technological interventions directed at aborting the seizure activity and improving clinical outcomes. Benzodiazepines remain one of the cornerstones of treatment, and studies are underway to study new delivery options, including intranasal, buccal, and intramuscular midazolam, in addition to rectal diazepam, with the goal of aborting the seizure activity outside the hospitals, as rapidly as possible. Approved and off-label anticonvulsants, such as phenytoin, phenobarbital, valproate, topiramate, levetiracetam, lacosamide, steroids, immunosuppressants, and neuroprotective compounds, have also shown some efficacy at treating SE. However, substantial challenges remain in optimally managing SE and minimizing the short- and long-term complications. Such difficulties can be overcome by innovative approaches targeting the underlying mechanisms of neuronal excitability, glia, neuronal death, neuroplasticity, oxidative stress, inflammation, and neuroinflammation.

## **Entrepreneurship, Innovation and Smart Cities**

### **Lean Construction**

Whatever your project management interests or informational needs, The Frontiers of Project Management Research offers you stimulating ideas for tomorrow and innovative approaches from today, all at your fingertips.

## **Frontiers of Management (Routledge Revivals)**

The development of international business and of globalization in every field of activity requires the interaction of individuals and groups with diverse cultural, religious, ethnic and social characteristics in different institutional contexts. Cross-cultural Challenges in International Management addresses the various difficulties that may impede smooth communication and cooperation of those involved in such interactions. It examines what types of resources are mobilized to overcome such difficulties. The cultural and societal challenges of international management must be considered at

different levels, the one of strategy, which the first part of the book is devoted to, but also that of management and business practices, addressed in the third part of the book. Both strategic decisions and daily business practices, however, in the particularly fluctuating and incompletely defined international context, gain from being framed by ethical and corporate social responsibility, which the second part of this book is devoted to. Cross-cultural Challenges in International Management provides an analysis of specific situations revealing such cultural or societal challenges. Thus, the reader will benefit not only from advanced theoretical knowledge in the field, but also from practical applications in various professional context and various countries. Practitioners, students in various fields of social sciences, particularly in management, communication, international relations, and researchers will widely benefit from this book.

### **Global Leadership Talent Management**

### **Errors in Organizations**

There has been increased emphasis on smart cities due to the economic, environmental and technological shifts that have impacted on society. This book focuses on how cities are becoming smarter, more innovative and entrepreneurial due to the increased pressures placed on them from societal changes in the global business environment. The book defines a smart city as an urban or rural development that integrates technology to enhance a city's assets, which may include community services, parkland, education, transportation and energy sources. The book aims to examine the role that innovation has in creating smart cities by focusing on issues such as public transport, use of energy efficiency and sustainability practices. It helps to shed understanding on how cities have become smarter in the way they handle increased migration to urban and rural areas and decrease the strain on public finances.
