key employee of Icarus Sun Works. Her death threatens to delay plans to launch a satellite to harvest solar energy and beam it to earth as electricity. When perfected, the technology will power entire cities for literally pennies. And the energy will be clean: no more BP disasters, no more Fukushima catastrophes. When the rocket carrying the satellite into space mysteriously explodes, Fisher learns that the sabotage is only the start of a complicated Chinese government campaign to thwart the project and steal the technology. After falling in love with the woman who designed the rocket, the irascible and over-caffeinated FBI agent must find a way to save her from assassination—and protect the satellite system from a wide-ranging conspiracy that will stop at nothing to destroy it. New York Times bestselling author Jim DeFelice delivers a gripping thriller inspired by real-life advances in clean energy technology in *The Helios Conspiracy*. When we think we learned something new, we are quite proud of it. But it wears off quickly for an unknown reason. So, what is wrong with what we do? When you start to think about the things you learn, and what the reason or purpose actually is, then you have to wonder sometimes is it really something new we just learned. Because having in mind to learn something new can be quite exhausting at times. Maybe we have to start to think about this in a different way, and take a different approach in discovering new things. It is like a treasure hunt, imagine that we are all pirates looking for an adventure or treasures. Obviously our life is about searching for something, but most of the time we dont even know what we are looking for. We do this quite instinctively, maybe we are preprogrammed in a way and we are not aware of it. But when you find out who we are, then everything seems to make sense. Our entire world (Universe) stands on myth and mythology (including our history), making us wonder if it is real. Lets look at life in a different way. Learn more about our history, maybe we can learn from old things our ancestors already new, and then set that aside and try to find your own way. You most certainly will see things with different eyes. This is what our life is all about, it is a soul search where the experience we have along the way is the reward (treasure). In Australia the Aboriginal people are most likely a candidate for such

an idea. They go on a regular Walkabout, which literally means looking for something. They might find something which can be worth bringing home as an idea for which the whole community can benefit from. This is what a walkabout is all about, looking for something which is useful, and has a value in the community. After all we are constantly occupied by making a living or providing for our needs. The westerners actually practice the same thing, we call them the Backpackers. People who go and see other parts of the world, enjoy the diversity and beauty of nature, as well as other cultures and traditions. Yes, we can learn something old, have a lot of fun and it can be quite rewarding. This book was taking shape, based on an ironic thought; How much knowledge there is, and we know so little. How come we know so little? We know all the most complicated things there can be, but we know very little of what life is about. What is the cause for all things? How does it all work? What is the reason? And last but not least; How do we fit into everything? Is it possible that we have taken valuable information from ancient Greek knowledge, but ignored one of their most important practices the philosophy of all things. Has everything to us become scientific or important because sciences can explain the real world. Have we forgotten that this real world we live in comes from a mystical source (something unseen). Something we call a different dimension because we cant possibly explain it. It is such an exotic source, that it would take a lot of ancient knowledge to discover the truth. Do you want to discover the truth? This book might have some answers.

The people of Denmark managed to save almost their country's entire Jewish population from extinction in a spontaneous act of humanity - one of the most compelling stories of moral courage in the history of World War II. Drawing on many personal accounts, Emmy Werner tells the story of the rescue of the Danish Jews from the vantage-point of living eyewitnesses- the last survivors of an extraordinary conspiracy of decency that triumphed in the midst of the horrors of the Holocaust. A Conspiracy of Decency chronicles the acts of people of good will from several nationalities. Among them were the German Georg F. Duckwitz, who warned the Jews of their impending deportation, the Danes who hid them and ferried them across the Oresund, and the Swedes who gave them asylum. Regardless of their social class, education, and religious and political persuasion, the rescuers all shared one important characteristic: they defined their humanity
