### The Big Book of Buds

“Indispensable.” —The New York Times Book Review Piet Oudolf’s gardens—unique combinations of long-lived perennials and woody plants that are rich in texture and sophisticated in color—are breathtaking and have deep emotional resonance. With *Planting*, designers and home gardeners can recreate these plant-rich, beautiful gardens that support biodiversity and nourish the human spirit. An intimate knowledge of plants is essential to the success of modern landscape design, and *Planting* shares Oudolf’s considerable understanding of plant ecology, explaining how plants behave in different situations, what goes on underground, and which species make good neighbors. Extensive plant charts and planting plans will help you choose plants for their structure, color, and texture. A detailed directory shares details like each plant’s life expectancy, the persistence of its seedheads, and its propensity to self-seed.

Alex Rogo is a harried plant manager working ever more desperately to try and improve performance. His factory is rapidly heading for disaster. So is his marriage. He has ninety days to save his plant - or it will be closed by corporate HQ, with hundreds of job losses. It takes a chance meeting with a colleague from student days - Jonah - to help him break out of conventional ways of thinking to see what needs to be done. Described by Fortune as a 'guru to industry' and by Businessweek as a 'genius', Eliyahu M. Goldratt was an internationally recognized leader in the development of new business management concepts and systems. This 20th anniversary edition includes a series of detailed case study interviews by David Whitford, Editor at Large, Fortune Small Business, which explore how organizations around the world have been transformed by Eli Goldratt's ideas. The story of Alex's fight to save his plant contains a serious message for all

Great Minds and How to Grow Them is a handbook for parents that shows how they can grow the minds of their children and teenagers and guide them to success both at school and in life. The latest neurological and psychological research is proving that most children are capable of reaching high levels of performance that were previously associated only with the gifted and talented. Brains are malleable and IQ is not fixed yet, without parental engagement in their learning, many children don't reach the levels of performance that are associated with academic success. Combining new knowledge with extensive research into how we learn, this book proves that by using simple, everyday techniques that are both rooted in research and accessible for parents, children can learn to learn more successfully. There is room at the top of the class for many more children than we ever thought possible. An engaging collaboration between a world-class academic and an award-winning journalist, this inspirational book includes chapters on: how to develop a good home learning environment; how to make the most of school; how to develop values, attitudes and attributes that are associated with success at school and in life; how to develop thinking and learning skills in the three ages of learning; how to tackle potentially tricky areas like homework and adolescence. This practical guide will be essential reading for parents, teachers and all those interested in helping children and young people to reach their full potential.
