For over 25 years, marketers have longed to connect with their customers and prospects as individuals. As the volume of customer communications across touch points grows exponentially and consumers' attention spans shrink by the day, delivering maximally relevant, individualized experiences has become an imperative. And while the one-to-one dream had been unattainable for years, machine learning and real-time processing have made it possible today. In this book--now in its second edition--discover what one-to-one personalization is all about, how it's evolved and what the future entails. Learn how it's driven by

machine learning, delivered across channels and powered by in-depth customer data brought together in a customer data platform (CDP). Get inspired by the potential for your business and gain insights on how to develop your own personalization strategy and program. Discover how to turn the one-to-one dream into a reality.

## **The Origin of Competitive Strength**

Learning is fun when you know how. It is only painful when you hit the three barriers to study and don't know what to do about them. These three barriers are the only reasons a child gets distracted or can't concentrate. They are enough to make a slow learner out of any child. The breakthrough is that they can be handled using simple and precise techniques.

Christian Schierenbeck makes a provocative case that higher education across the globe suffers from a profound productivity crisis which prevents broad access to affordable and high-quality educational services. He shows how the vast productivity gap in higher education could be closed if academic managers borrowed some of the managerial practices applied by the world's leading business enterprises. In order for this to happen in practice, the author argues for radical changes in the policy framework for higher education.

Walt McCall follows up his successful Classic American Ambulances 1900-1979

Photo Archive with a new and expanded title that fills in a heretofore missing chapter in American emergency vehicle history. This book chronicles in words and photos the evolution of the emergency ambulance in America over the past 100 years. From the slow jouncing horse-drawn vehicles in use at the turn of the last century to the fleet electronics-laden advanced life support units on the streets and highways of today - you'll find it all here. A fascinating story that is long overdue. The book is divided into chapters illustrating ambulances by decade. Each chapter begins with 2-4 pages of text describing major innovations and improvements introduced during the decade.

This book offers the first exploration into the development of social enterprises in the Greater China region, consisting of Hong Kong, Macau, Taiwan and Mainland China. By drawing on the research and experience of over a dozen scholars and practitioners from across the area, it offers a picture of how a strong State can play

an important role as a catalyst in developing the social entrepreneurship sector, particularly by legitimizing it. It delves into the role and impact of institutions and policy on the development of social enterprises, and explains how micro and macro factors might interact in influencing social entrepreneurship. Structured in two parts – policy and cases – it reveals the historical development of the Social enterprises sector in the Chinese context and then illustrates this using cases studies. Providing an alternative view of social entrepreneurship by highlighting the importance of context in this new sector, the book questions whether or not social entrepreneurship is preferable to more conventional models of development. Sparking new interest and offering fresh insight into social entrepreneurship in the Greater China region, this book will be useful to students and scholars of Chinese Studies, Business Studies and Sociology.

Official U.S. edition with full color illustrations throughout. NEW YORK TIMES BESTSELLER Yuval Noah Harari, author of the critically-acclaimed New York Times bestseller and international phenomenon *Sapiens*, returns with an equally original, compelling, and provocative book, turning his focus toward humanity's future, and our quest to upgrade humans into gods. Over the past century humankind has managed to do the impossible and rein in famine, plague, and war. This may seem hard to accept, but, as Harari explains in his trademark style—thorough, yet riveting—famine, plague and war have been transformed from incomprehensible and uncontrollable forces of nature into manageable challenges. For the first time ever, more people die from eating too much than from eating too little; more people die from old age than from infectious diseases; and more people commit suicide than are killed by soldiers, terrorists and criminals put together. The average American is a thousand times more likely to die from bingeing at

McDonalds than from being blown up by Al Qaeda. What then will replace famine, plague, and war at the top of the human agenda? As the self-made gods of planet earth, what destinies will we set ourselves, and which quests will we undertake? Homo Deus explores the projects, dreams and nightmares that will shape the twenty-first century—from overcoming death to creating artificial life. It asks the fundamental questions: Where do we go from here? And how will we protect this fragile world from our own destructive powers? This is the next stage of evolution. This is Homo Deus. With the same insight and clarity that made Sapiens an international hit and a New York Times bestseller, Harari maps out our future.

### **Policy and Choice**

Red Teaming is a revolutionary new way to make critical and contrarian thinking part of the planning process of any organization, allowing companies to stress-test their strategies, flush out hidden threats and missed opportunities and avoid being sandbagged by competitors. Today, most — if not all — established corporations live with the gnawing fear that there is another Uber out there just waiting to disrupt their industry. Red Teaming is the cure for this anxiety. The term was

coined by the U.S. Army, which has developed the most comprehensive and effective approach to Red Teaming in the world today in response to the debacles of its recent wars in Iraq and Afghanistan. However, the roots of Red Teaming run very deep: to the Roman Catholic Church's "Office of the Devil's Advocate," to the Kriegsspiel of the Prussian General Staff and to the secretive AMAN organization, Israel's Directorate of Military Intelligence. In this book, author Bryce Hoffman shows business how to use the same techniques to better plan for the uncertainties of today's rapidly changing economy. Red Teaming is both a set of analytical tools and a mindset. It is designed to overcome the mental blind spots and cognitive biases that all of us fall victim to when we try to address complex problems. The same heuristics that allow us to successfully navigate life and business also cause us to miss or ignore important information. It is a simple and provable fact that we do not know what we do not know. The good news is that, through Red Teaming, we can find out. In this book, Hoffman shows how the most innovative and disruptive companies, such as Google and Toyota, already employ some of these techniques organically. He also shows how many high-profile business failures, including those that sparked the Great Recession, could easily have been averted by using these approaches. Most importantly, he teaches leaders how to make Red Teaming part of their own planning process, laying the foundation for a movement that will change the way America does business.

"A Star is Bored is an absolute knockout. Riotously funny and wickedly tender." — Taylor Jenkins Reid, New York Times bestselling author of Daisy Jones and the Six People Magazine Best Book of Summer 2020 - Named a Must-Read Summer book by Town & Country - Named One of the 14 Best Books of Summer 2020 by Harper's Bazaar - One of Library Journal's 2020 "Titles to Watch" - One of the 30 Best Beach Reads According to Parade Magazine The Devil Wears Prada meets Postcards From the Edge in a hilariously heartfelt novel influenced in part by the author's time assisting Carrie Fisher. Charlie Besson is tense and sweating as he prepares for an insane job interview. His car is idling, like his life, outside the Hollywood mansion of Kathi Kannon, star of stage and screen and People magazine's worst dressed list. She needs an assistant. He needs a hero. Kathi is an icon, bestselling author, and an award winning actress, most known for her role as Priestess Talara in a blockbuster sci-fi film. She's also known in another role: crazy. Admittedly so. Famously so. Fabulously so, as Charlie quickly discovers. Their three year odyssey is filled with late night shopping sprees, last minute trips to see the aurora borealis, and an initiation to that most sacred of Hollywood tribes: the personal assistant. But Kathi becomes much more than a boss, and as their friendship grows, Charlie must make a choice. Will he always be on the sidelines of life, assisting the great forces that be, or can he step into his own leading role? Laugh-out-loud funny, and searingly poignant, Byron Lane's A Star is Bored is a novel that, like the star at its center, is enchanting and joyous, heartbreaking and hopeful.

A trace element (TE) is a chemical element presented below  $\sim 0.1$  wt. % and required in minute quantities to maintain proper physical functioning. TE analysis in clinical samples (plasma, urine, cerebro-spinal fluid, full-term placenta, hair, nails, buccal mucosa, semen, biopsy specimens) has received increasing attention. Based on 62 sources, current effort presents comparative knowledge about the attempts to accurately trace TE in clinical samples through Vis/NIR, PIXE, TXRF, GFAAS, ICP-MS. It informs the need for further research adjustments to reveal the reciprocal states of certain TE (Cu/Zn, Ca/Mg, Fe/ Pb) in correlation with their real-time counts in both maternal and neonatal umbilical cord plasma, and in relation to augmented oxidative stress. This would help to achieve consistency in interpreting obstetrical complications (preeclampsia, prematurity, or gestational diabetes). Generated hypotheses should target plausible mechanisms behind TE alterations and their stage-sensitive measures in gynecological cancer. New prospects are discussed in management and prognosis of endometriosis and premature ovarian failure (POF).

This book tells the story of a partnership between two universities that spent several years exploring productive ways to engage difficult dialogues in classroom and academic settings. It presents a model for a faculty development intensive, strategies for engaging controversial topics in the classroom, and reflections from thirty-five faculty and staff members who field-tested the techniques. It is intended as a conversation-starter and field manual for professors and teachers who want to strengthen their teaching and engage students more effectively in important conversations.

## **Learning How to Learn**

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I

was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst.

#1 NEW YORK TIMES BESTSELLER • In *Sapiens*, he explored our past. In *Homo Deus*, he looked to our future. Now, one of the most innovative thinkers on the planet turns to the present to make sense of today's most pressing issues.

"Fascinating . . . a crucial global conversation about how to take on the problems of the twenty-first century."—Bill Gates, *The New York Times Book Review* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES AND PAMELA PAUL, KQED

How do computers and robots change the meaning of being human? How do we deal with the epidemic of fake news? Are nations and religions still relevant? What should we teach our children? Yuval Noah Harari's *21 Lessons for the 21st Century* is a probing and visionary investigation into today's most urgent issues as we move into the uncharted territory of the future. As technology advances faster than our understanding of it, hacking becomes a tactic of war, and the world feels more polarized than ever, Harari addresses the challenge of navigating life in the face of constant and disorienting change and raises the important questions we need to ask ourselves in order to survive. In twenty-one accessible chapters that are both provocative and profound, Harari builds on the ideas explored in his previous books, untangling political, technological, social, and existential issues and offering advice on how to prepare for a very different future from the world we now live in: How can we retain freedom of choice when Big Data is watching us? What will the future workforce look like, and how should we ready ourselves for it? How should we deal with the threat of terrorism? Why is liberal democracy in

crisis? Harari's unique ability to make sense of where we have come from and where we are going has captured the imaginations of millions of readers. Here he invites us to consider values, meaning, and personal engagement in a world full of noise and uncertainty. When we are deluged with irrelevant information, clarity is power. Presenting complex contemporary challenges clearly and accessibly, *21 Lessons for the 21st Century* is essential reading. "If there were such a thing as a required instruction manual for politicians and thought leaders, Israeli historian Yuval Noah Harari's *21 Lessons for the 21st Century* would deserve serious consideration. In this collection of provocative essays, Harari . . . tackles a daunting array of issues, endeavoring to answer a persistent question: 'What is happening in the world today, and what is the deep meaning of these events?'"—BookPage (top pick)
