Bacterial Genomes

In this, the third in the Dermot O'Hara detective series, Kenmare is the scene of an attempted murder, distracting O'Hara from another serious case and leading him to question the value of friendship. Despite the efforts of his wife and their loyal friends, a fatal error of judgement leads him into the presence and the crosshairs of an assassin.

Cancer Cell Lines

Continuous cell lines derived from human cancers are the mostwidely used resource in laboratory-based cancer research. The first 3 volumes of this series on Human Cell Culture are devoted to these cancer cell lines. The chapters in these first 3 volumes have a common aim. Their purpose is to address 3 questions offundamental importance to the relevanceof human cancer cell lines as model systems of each type of cancer: 1. Do the cell lines available accurately represent the clinical presentation? 2. Do the cell lines accurately represent the histopathology of the original tumors? 3. Do the cell lines accurately represent the molecular genetics of this type of cancer? The cancer cell lines available are derived, in most cases, from the more aggressive and advanced cancers. There are few cell lines derived from low grade organ-confined cancers. This gap can be filled with conditionally immortalized human cancer cell lines. We do not know why the success rate for establishing cell lines is so low for some types of cancer and so high for others. The histopathology of the tumor of origin and the extent to which the derived cell line retains the differentiated features of that tumor are critical. The concept that a single cell line derived from a tumor at a particular site is representative oftumors at that site is naïve and misleading.

Masters of Empire

"An unforgettable character, with a heart as big as her pocketbook, a fine disregard for convention and an insatiable appetite for life." —Denver Post The fabulous Phryne Fisher, her sister Beth and her faithful maid, Dot, decide that Luna Park is the perfect place for an afternoon of fun and excitement with Phryne's two daughters, Ruth and Jane. But in the dusty dark Ghost Train, amidst the squeals of horror and delight, a mummified bullet-studded corpse falls to the ground in front of them. Phryne Fisher's pleasure trip has definitely become business. Digging into this longstanding mystery takes her to the country town of Castlemaine where it's soon obvious that someone is trying to muzzle her investigations. With unknown threatening assailants on her path, Phryne seems headed for more trouble than usual.

Together Always

The Definitive Guide to Building Web-Centric SOA with REST The World Wide Web is based on the most successful technology architecture in history. It has changed how we view, access, and exchange information and, with the advent of REST, it has also provided us with compelling ways to build and improve automation solutions. REST provides a great deal of guidance to ensure that an architecture and its automation logic are technically sound, though it is still your responsibility to build services that actually add value to your business. SOA with REST is the first comprehensive tutorial and reference for designing and building RESTful services as part of service-oriented solutions and in conjunction with service-oriented architecture (SOA). This book demonstrates that REST is not only a suitable medium for building truly service-oriented solutions, but also that the service-oriented architectural model is a necessary foundation for REST technology architectures to realize their full business potential. The authors provide thorough mapping of REST constraints and architectural goals with service-orientation principles and SOA characteristics. Using real-world examples, they show how to leverage REST's simplicity, flexibility, and low overhead without compromising the power or manageability of service-oriented solutions and architectures. This ebook will be valuable to IT architects, developers, and any practitioner seeking to use SOA and REST together.

Castle Cay

"This double cassette, recorded by native French speakers, is a valuable component of the Colloquial French course. While reinforcing material from the book, the cassettes also contain a variety of additional exercises, including role-playing. This makes them suitable for use in conjunction with other French courses"--Container.

International Symposium: Retroviruses and Human Pathology

Blood Is Thicker Than Water

Most of the shaping in the manufacture of polymeric objects is carried out in the melt state, as it is a substantial part of the physical property development. Melt processing involves an interplay between fluid mechanics and heat transfer in rheologically complex liquids, and taken as a whole it is a nice example of the importance of coupled transport processes. This book is on the underlying foundations of polymer melt processing, which can be derived from relatively straightforward ideas in fluid mechanics and heat transfer; the level is that of an advanced undergraduate or beginning graduate course, and the material can serve as the text for a course in polymer processing or for a second course in transport processes.

Final Justice

Rescuing Lily as a young child from her lecherous guardian, Trace Dushane nurtures and protects her throughout their childhood, and years later, Lily returns to tell Trace that she has fallen in love with him. Reprint.

The Final Silence

"In the last ten years, the United States—the most powerful and technically advanced society in human history—has been confronted by a series of ominous, seemingly intractable crises. First there was the threat to the environmental survival; then there was the apparent shortage of energy; and now there is the unexpected decline of the economy. These are usually regarded as separate afflictions, each to be solved in its own terms: environmental degradation by pollution controls; the energy crisis by finding new sources of energy and new ways of conserving it; the economic crisis by manipulating prices, taxes, and interest rates. But each effort to solve one crisis seems to clash with the solution of the others—pollution control reduces energy supplies; energy conservation jobs. Inevitably, proponents of one solution become opponents of the others. Policy stagnates and remedial action is paralyzed, adding to the confusion and gloom that beset the country." So opens Barry Commoner's *The Poverty of Power*, the book in which America's great biologist and environmentalist addresses himself to the central question of our day. He concludes that "what confronts us is not a series of separate crises, but a single basic deficit—a fault that lies deep in the design of modern society. This book is an effort to unearth that fault, to trace its relation to the separate crises, and to consider what can be done to correct it at its root."

The Idealized Column

A new and revised edition of Alan Sked's groundbreaking book which examines how the Habsburg Empire survived the

revolutionary turmoil of 1848. 'The Year of Revolutions', saw the whole of Europe convulsed in turmoil and revolt. Yet the Habsburg Empire survived. As state after state succumbed to the violent winds of change that were sweeping the continent. How did the Habsburg Empire survive? How was the army able hold together while the rest of the empire collapsed in civil war, and how was it able to seize the political initiative In this new edition, Alan Sked reflects on the changed understanding of the period which resulted from the first appearance of this book, and widens the discussion to look at the Habsburg Empire alongside the decline of the Russian and German Empires, arguing that it is possible to understand their decline from a broad European perspective, as opposed to the overly narrow focus of recent explanations. Alan Sked makes us look at familiar events with new eyes in this radical, vigorously written classic which is essential reading for anyone interested in the history of nineteenth-century Europe.

Poverty of Power

"I'm following them," Aeron answered. "And?" "I'll have a perfect shot on her," he said. "Good," was the reply. "How did you want it?" "Two in the chest," he answered. "The others were sloppy. His wife was still alive when he got to her. Make sure he doesn't have a chance to say good-bye." Police Lieutenant Jonathan Greene is set in his ways. And young, rising detective Courtney Shields is just going to get in the way of that. When assigned as partners in the Indianapolis Metropolitan Police Department, they quickly butt heads and struggle to find common ground. But after a surprise joint venture starring as the two main characters in a community play, the two form a bond that will quickly be of infinite value. As Jon's history is revealed, the pair find that soon it will resurface into the present. Jon's friends and family become the targets of serious threats. With Jon's loved ones in danger, he will do anything to protect them and discover who is making the threats. Dodging danger and hostility along the way, Jon and Courtney will stop at nothing. Will they be successful? Will they be able to use their investigative skills to solve the case, or will their emotions and protectiveness get in the way? Find out as the two detectives determine that Blood Is Thicker Than Water.

Succeeding in Mathematics: Grade 5 (yellow)

This New York Times bestseller is perfect for fans of Tana French and Dennis Lehane. Midwinter. A child is found wandering through the snowy woods, her hands covered in someone else's blood. And she cannot—or will not—speak, not even to share her name. Who is this little girl lost? The only adult she seems to trust is the young officer who found her, Detective Lucy Black. Before long, Lucy manages to connect her case to that of a missing teenager, the kidnapped daughter of a local real estate tycoon. As the investigation twists and turns, Lucy is forced to question not only a range of dangerous suspects, but also everything she thought she knew about her own past.

The Limits of Loyalty

A wide range of microbiologists, molecular biologists, and molecular evolutionary biologists will find this new volume of singular interest. It summarizes the present knowledge about the structure and stability of microbial genomes, and reviews the techniques used to analyze and fingerprint them. Maps of approximately thirty important microbes, along with articles on the construction and relevant features of the maps are included. The volume is not intended as a complete compendium of all information on microbial genomes, but rather focuses on approaches, methods and good examples of the analysis of small genomes.

A Survey of the Theories of Creep Buckling

The Cartel has come full circle with this fast-paced, groundbreaking novel, the finale to the hit series by New York Times bestsellers Ashley & JaQuavis. Miamor is fighting for her life in the belly of the beast. She's been kidnapped, and she's staring death in the eye. Is the reign over for the head of the Murda Mamas? Carter is in federal custody and leaves the Diamond Empire to Zyir and Mecca. When the past comes back to haunt Mecca and the truth finally comes to light, will The Cartel rise or fall? Breeze is in the clutches of the crazed Ma'tee, and she desperately searches for a way out. Will she escape, or die his love slave? The answers to these questions lie inside the pages of Cartel 3: The Final Chapter. Open it to discover the shocking truth, and prepare yourself for the unpredictable conclusion of one of the best street series of all time.

Acting Is a Job

This is a major new contribution to the historiography of the First World War. It examines the lively battle of ideas which helped to destroy Austria-Hungary. It also assesses, for the first time, the weapon of 'front propaganda' as used by and against the Empire on the Italian and Eastern Fronts. Based on material in eight languages, the work challenges accepted views about Britain's primacy in the field of propaganda, while casting fresh light on the creation of Yugoslavia and the viability of the Habsburg Empire in its last years.

History of Concepts

Hoewel enorm invloedrijk in Duitstalig Europa, heeft de conceptuele geschiedschrijving (Begriffsgeschichte) tot nu toe weinig aandacht in het Engels gekregen. Dit genre van intellectuele geschiedschrijving verschilt van zowel de Franse geschiedschrijving van mentalités als de Engelstalige geschiedschrijving van verhandelingen door het concept. Aan de hand

van praktische voorbeelden in de geschiedschrijving wordt deze vorm toegelicht door Bram Kempers, Eddy de Jongh en Rolf Reichardt.

Little Girl Lost

For decades retroviruses have been riding the crest of a wave of experimental research directed toward the identification of an infectious agent of human neoplastic diseases. In the early 1970s, several scientists successfully demonstrated the presence of retroviruses in numerous animal species and proved their etiological role in some related diseases. Corresponding findings in humans were somewhat discouraging. Although financial support for this line of research declined, a few dedicated retrovirologists survived and continued to collect more biological information and technological expertise that opened a new approach to the search for a human retrovirus. The rewards came with the discovery that the genes responsible for neoplastic transformation (oncogenes) are of cellular origin and can be shuttled about by retroviruses, and with the identification of a new family of Human T-cell Lymphotropic retroViruses (HTLV) from patients with diseases ranging from leukemia to the acquired immunodeficiency syndrome (AIDS). An understanding of the role and significance of retroviruses in human pathology requires basic knowledge of the major animal systems studied. With this perspective in mind, we present here a survey that includes general overviews, minireviews on each animal system studied with selected experimental reports and, finally, a stimulating review of the field of human retrovirology by many of the pioneer scientists who created it. We are especially grateful to Profs. C. A. Romanzi and G. C. Schito for promoting the organization of the Symposium. On behalf of the Symposium Committee, we thank E. Soeri, L. Casarino, G. P. Gesu, M.

The Castlemaine Murders

Murder, loyalty, and vengeance collide in a gritty read perfect for fans of Martina Cole and Kimberley Chambers. 'Orange is the New Black meets a twisted Southampton' Molly, Amazon reviewer 'If you like a crime novel with a strong female lead then you'll love this' Katie, Amazon reviewer

The Decline and Fall of the Habsburg Empire, 1815-1918

Kit O'Malley is back - tougher, smarter, and more dangerous than ever. And this time it's not just her smart mouth that gets Kit into trouble. In her favorite bar, owned by her friend Angie, a bloodless corpse is found. Kit is on the scene and determined to do what she can. But Detective-Sergeant Graham Parker is in charge, which does nothing to reassure Kit that the real killer will be found. Then the corpse is identified as a member of a notorious crime family - and a bad situation has just got a whole lot worse. It seems like the city is heading for a violent gang war. Kit must pick her way through the

Melbourne underworld, dealing with characters like Doghouse Dixon and Will Thumpya, and ending up in the kitchen of crime matriarch Queenie Riley. Sure, the PI with the mean right hook knows how to look after herself, but asking the right questions of the wrong people soon drags Kit's friends into danger. As her personal life and work life get ever more entangled, Kit struggles with events that are fast moving beyond her control.

Colloquial French

When her best friend is murdered, Julie O'Hara, a body language expert packs up her suspicion and flies from Florida to Boston for his funeral. Before long Julie's sixth-sense pulls a hidden string that unravels a deadly conspiracy.

Human Prehistory in Fiction

The "Europe against Cancer" programme has, from its inception, emphasised the key role which general practitioners must play in the actions necessary to achieve its aim of reducing the incidence and the mortality from cancer in the European Community. General practitioners, because of their day-to-day direct and continuing contact with patients, play a role not only in primary prevention and education of patients, but also in motivating their patients to accept secondary prevention and screening, some of it carried out by general practitioners themselves. These preventive activities are in addition to their traditional role in the care and management of patients with cancer at home, and increasingly, their role in active treatment. In view of the importance of the general practitioner in the "Europe against Cancer" programme, the European Commission, with a view to providing general practitioners with up-to-date useful information, has sponsored the production of this series of publications on organ based cancers, especially written for general practitioners. MICHEL RICHONNIER Coordinator of the "Europe against Cancer" programme, Commission of the European Communities, Brussels

Preface The present textbook is the second in the series published by the Commission of the European Communities within the context of the "Europe Against Cancer" Programme. After lung cancer, it was felt that priority should be given to breast cancer, the most frequent neoplastic disease among European women.

The Loneliest Man in the World

Just as with his remarkable military novels, millions of readers have been captured by the rich characters and vivid realism of W. E. B. Griffin's police dramas. "Griffin has the knack," writes The Philadelphia Inquirer. He "sets his novel before you in short, fierce, stop-for-nothing scenes. Before you know it, you've gobbled it up." Now, in Final Justice, Detective Matt Payne of the Philadelphia police department—newly promoted to sergeant and assigned to Homicide—finds himself in the middle of three major assignments. The first case, a fatal shooting at a fast-food restaurant, seems simple, but rapidly becomes

complicated. The second, a rape that tumbled into murder, begins complicated and only gets more so, as it becomes apparent that the crime may be part of a disturbing, and escalating, pattern. The third is the most bizarre, as Payne becomes involved with a local figure who long ago fled the country, leaving behind the mummified body of his girlfriend in a trunk. Ever since, the murderer has been sending taunting postcards from his safe haven—but all that may be about to change. Weaving in and around this already hectic schedule are the visit to Philadelphia of the self-absorbed star of a series of improbable police movies, who wants Payne to show him “the real stuff,” and the appearance in Payne’s life of two very different women. Either one of them alone would be enough to set his head spinning, but together . . . this might be the most complicating thing of all. Filled with color and detail and plots as real as the headlines, this is a riveting novel of the men and women who put their lives on the line, from the cop on the beat to the commissioner himself. It’s a story of fears, dangers, courage, loyalty, and genuine heroism: storytelling at its best.

A Book on Writing

No Marketing Blurb

Let Us Java: Strong Foundation for JAVA Programming (English Edition)

Geared toward advanced undergraduates and graduate students, this outstanding text was written by one of the founders of bioengineering and modern biomechanics. It offers unusually thorough coverage of the interaction of aerodynamic forces and elastic structures. It has also proven highly useful to designers and engineers concerned with flutter, structural dynamics, flight loads, and related subjects. An introductory chapter covers concepts of aerodynamics, elasticity, and mechanical vibrations. Chapters 2 through 11 survey aeroelastic problems, their historical background, basic physical concepts, and the principles of analysis. Chapters 12 through 15 contain the fundamentals of oscillating airfoil theory and a brief summary of experimental results. Each chapter is followed by a bibliography, and 147 illustrations and 20 tables illuminate the text.

The Disciple's Manual

The main factor which destroyed the Habsburg Monarchy was the problem of nationality and its dissolution was hastened, but not caused, by World War I. Oscar Jászi spent twenty years studying the dangers that threatened this monarchy but his practical plans for averting these dangers were not given a hearing until it was too late. This book was the culmination of Mr. Jászi’s theoretical and practical activity and was enthusiastically received when first published in 1929. “It is not only effective and dramatic narrative, it is also political science of the first order.”—Harold J. Laski “The work is a liberal

education in Central European politics.”—Henry C. Alsberg, *The Nation* “There have been many books written on the breakup of the Austro-Hungarian Empire, but there is none which goes so deeply into the causes in this pitiless yet pitiful analysis, rigorously buttressed with statistics, the tragedy is described without bitterness but with deep feeling.”—*The Manchester Guardian*

An Introduction to the Theory of Aeroelasticity

• How to cope with the realities of life as an actor—if you don’t laugh, you’ll cry • In-depth interviews with actors, agents, casting directors. In this hip, warts-and-all look at acting, author Jason Pugatch shares his insights as a working “day player” to give an unvarnished look at theater, film, and television: how to be “discovered,” what to expect from training programs, the grunt work of starting a career, how to keep going despite constant rejection, and much more. Packed with myth-shattering anecdotes and told in an intriguing personal tone, *Acting Is a Job* is the backstage guide that every aspiring actor must read. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don’t aspire to publish a *New York Times* bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

The Dissolution of the Habsburg Monarchy

Empire to Nation

Discover a “roaring-and addictive-gothic world” (*Publishers Weekly*) in the explosive conclusion of the *Something Strange and Deadly* trilogy from *New York Times* bestselling author Susan Dennard—now with a gorgeous new cover. It has been a tumultuous time for Eleanor Fitt since life as she knew it in Philadelphia came to an abrupt end. Although the Spirit-Hunters—Joseph, Jie, and Daniel—have helped her survive, Eleanor has lost almost everything. And now, Jie has been taken by the evil necromancer Marcus. Eleanor is determined not only to get Jie back but to finally end this nightmare. To do so, she must navigate the hot desert streets of nineteenth-century Egypt amid the rising Dead, her unresolved feelings for Daniel, and her volatile relationships with Joseph and with Oliver, her demon. But it won’t be easy. Because Allison, her friend from Philadelphia, has tagged along, becoming strangely entangled in Eleanor’s mission.

Thicker Than Water

English summary: European Empires with their multi-ethnic societies have long been considered as failures, and their history was often presented as a narrative of mere disintegration and decay. With the ever dominating subject of nation-state formation receding, a new scope for considering empires as the much longer and pervasive alternative in European history opens up. Against this background, this volume contributes to a more systematic comparison of the ambivalent and changing relationships between centre and periphery, between colonizers and colonized in the British Empire, the Habsburg Monarchy, Russia and the Ottoman Empire. The spectrum of such relationships reaches from infrastructures and political conflicts to the practice of monarchy and religion and war experiences. A mere addition of case-studies is avoided by inter-relating the contributions on the basis of comparative comments by leading specialists in the respective fields. German text. German description: Europas Grossreiche waren geprägt von ethnischer Differenz und raumlicher Vielfalt. Gerade diese Pluralität galt lange als Ursache für Scheitern und Zerfall. Empires prägten die Geschichte Europas jedoch viel länger und stärker als die jungen Nationalstaaten, die unsere Vorstellung von Europa bis heute bestimmen. Die Beiträge dieses Bandes vergleichen systematisch vier europäische Empires im 19. und frühen 20. Jahrhundert: das Britische Empire, die Habsburgermonarchie, Russland und das Osmanische Reich. Wie spannungsreich die Beziehungen zwischen Zentrum und Peripherie sowie zwischen Herrschern und Beherrschten waren, wird am Beispiel von Infrastrukturen, Konflikten und Kriegserfahrungen ebenso deutlich wie anhand der Praxis von Monarchie und Religion.

Comparing Empires

Excerpt from The Analysis of Structures: Based on the Minimal Principles and the Principle of Virtual Displacements Many students of engineering consider the analysis of structures a rather boring subject. They do not understand the justification of the assumptions made, and they get tired of memorizing scores of unrelated formulas, rules, and procedures. It is the hope of the author that in this volume he has proved that these objections to the theory of structures are not justified because the study of structures can be an exciting undertaking. The various methods used by structural engineers are all logically interconnected if one looks upon them, from a unifying standpoint. Not a single formula need be memorized if the fundamental principles are understood; every method presented in this book is an almost obvious consequence of the basic principles and can be derived with a minimum amount of mathematical manipulation. The various devices suggested for increasing the accuracy of the calculations and reducing the work involved may appear as tricks to the uninitiated. But to the reader of this book, these devices should become obvious applications of the basic principles. The first purpose of this volume is therefore the presentation of structural analysis as a logical and unified theory based on a small number of first assumptions. To achieve it, the principle of virtual displacements is chosen as the starting point. The second purpose is the development of the minimal principles of structural theory; they have been used so generally in the engineering literature

of the last few years that no modern practicing engineer can afford to ignore them. Finally an effort is made to give the reader a thorough understanding of buckling phenomena. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Cancer Cell Lines

This publication is a self-study book on writing. It is designed primarily for English language students at an advanced level, i.e. the Cambridge Certificate in Advanced English, Cambridge Proficiency and those students preparing to achieve approximately between 6.0 and 7.5 in the IELTS exam. The book has been written from a cognitive, rather than a grammatical, point of view. --pref.

The Analysis of Structures

Learn the basics of most favoured dynamic language for application development Key Features Major reorganisation of chapters with a view to improve comprehension of concepts involved Comprehensive coverage of all the concepts of Core Java Simple language, crystal clear approach, user-friendly book Concepts are duly supported by several examples and self-explanatory analogies. Description Java Language is very popularly used for creating applications for PC, Laptop, Tablet, Web and Mobile world Learning a language that can work on so many different platforms can be a challenge. This is where you would find this book immediately useful. It follows a simple and easy narration style. It doesn't assume any programming background. It begins with the basics and steadily builds the pace so that the reader finds it easy to handle complex topics towards the end. Each chapter has been designed to create a deep and lasting impression on the reader's mind. Object-Oriented Programming has been covered in detail to give a strong foundation for Java Programming. Well thought out and fully working example programs and carefully crafted exercises of this book, cover every aspect of Java programming. What will you learn Data types & Control Instructions Classes & Objects Arrays & Strings Inheritance & Polymorphism Interfaces, Packages Exception Handling, Effective IO Multithreading & Synchronization Generics, Collection classes, GUI Using Swing Database Connectivity Using JDBC Who this book is for This book will prove to be a "must have" for beginners as well as experienced professionals as it is a stepping stone for learning Java technology. Table of Contents
1. An Overview of Java
2. Getting Started
3. Java Data Types and Instructions
4. Decision Control Instruction
5. Loop Control Instruction
6. Case-Control Instruction
7. Functions
8. Advanced Features of Functions
9. Introduction to OOP
10. Classes

and Objects 11. Arrays 12. Strings and Enums 13. Inheritance 14. Polymorphism 15. Exception Handling 16. Effective Input/Output 17. Multithreading In Java 18. Generics 19. Collection Classes 20. User Interfaces 21. JDBC 22. Index About the Author Yashavant Kanetkar Through his books and Quest Video Courses on C, C++, Java, Python, Data Structures, .NET, IoT, etc. Yashavant Kanetkar has created, molded and groomed lacs of IT careers in the last three decades. Yashavant's books and Quest videos have made a significant contribution in creating top-notch IT manpower in India and abroad. Yashavant's books are globally recognized and millions of students/professionals have benefitted from them. Yashavant's books have been translated into Hindi, Gujarati, Japanese, Korean and Chinese languages. Many of his books are published in India, USA, Japan, Singapore, Korea and China. Yashavant is a much sought after speaker in the IT field and has conducted seminars/workshops at TedEx, IITs, IIITs, NITs and global software companies. The Cartel 3:

Polymer Melt Processing

Stuart Neville, “the current master of neo-noir detective fiction” (Boston Globe), is back with a chilling new thriller Belfast, Northern Ireland: Rea Carlisle has inherited a house from an uncle she never knew. It doesn't take her long to clear out the dead man's remaining possessions, but one room remains stubbornly locked. When Rea finally forces it open, she discovers inside a chair, a table—and a leather-bound book, its pages filled with locks of hair, fingernails: a catalogue of victims. Horrified, Rea wants to go straight to the police but her family intervenes, fearing that scandal will mar her politician father's public image. Rea turns to the only person she can think of: disgraced police inspector Jack Lennon. He is facing suspension from the force and his new supervisor, DCI Serena Flanagan, is the toughest cop he's ever met. But a gruesome murder brings the dead man's terrifying journal to the top of the Belfast police's priority list.

Breast Cancer

What was the world like for people thousands of years ago? How can we know? Through fiction? This is a work of literary criticism, and more. It begins with a discussion of the problem of authenticity and then considers twelve pieces of fiction that depict human prehistory: H.G. Wells' The Island of Doctor Moreau, Pierre Boulle's The Planet of the Apes, Jules Verne's The Village in the Treetops, Edgar Rice Burroughs' The Land That Time Forgot, the struggle for legitimacy in Wells' “The Grisly Folk,” the Tasmanian analogue in Lester Del Rey's “The Day Is Done,” William Golding's The Inheritors, “the promise of humanity” in Arthur C. Clarke's 2001: A Space Odyssey, the theme of “a god among the heathen” in Wells' “The Lord of

the Dynamos” and other works, Jean Auel’s *The Clan of the Cave Bear*, J.H. Rosny-Aîné’s *Quest for Fire*, and Wells’ *The Time Machine: An Invention*. A final chapter considers the paleoanthropologist as literary critic.

The Madam

What every disciple is called to is as radical as it comes. For more than half a century, practicing and proclaiming biblical discipleship has been the author's heart-beat. This is that life's ministry captured for you in a book.

Strange and Ever After

The fall of empires and the rise of nation-states was a defining political transition in the making of the modern world. Here, ten prominent specialists discuss the empire-to-nation transition in comparative perspective. Chapters on Latin America, the Middle East, Eastern Europe, Russia, and China illustrate both the common features and the diversity of the transition. While previous studies have focused on the rise and fall of empires or on nationalism and the process of nation-building, this intriguing volume concentrates on the empire-to-nation transition itself.

SOA with REST

This book describes all human leukemia-lymphoma cell lines that have been established and that grow continuously under standardised in vitro conditions. These lines are derived from cells belonging to all the major hematopoietic cell lineages, i.e. B- and T-lymphocytes, natural killer cells, granulocytic cells and megakaryocytic cells. The clinical data, the culture conditions and the major phenotypic features of the cell lines are described with citations. This book is the first book describing human leukemia-lymphoma cell lines and will be of interest to scientists involved in the areas of hematology, oncology, immunology, molecular biology and cytogenetics. *Cancer Cell Lines, Volumes 1-3*: These 3 volumes provide a comprehensive text on the culture of established cell lines from every type of human cancer. The volumes provide a basic manual and reference resource for every cancer research scientist using human cancer cells.

The Undermining of Austria-Hungary

A radical reinterpretation of early American history from a native point of view In *Masters of Empire*, the historian Michael McDonnell reveals the pivotal role played by the native peoples of the Great Lakes in the history of North America. Though less well known than the Iroquois or Sioux, the Anishinaabeg who lived along Lakes Michigan and Huron were equally influential. McDonnell charts their story, and argues that the Anishinaabeg have been relegated to the edges of history for

too long. Through remarkable research into 19th-century Anishinaabeg-authored chronicles, McDonnell highlights the long-standing rivalries and relationships among the great tribes of North America, and how Europeans often played only a minor role in their stories. McDonnell reminds us that it was native people who possessed intricate and far-reaching networks of trade and kinship, of which the French and British knew little. And as empire encroached upon their domain, the Anishinaabeg were often the ones doing the exploiting. By dictating terms at trading posts and frontier forts, they played a crucial role in the making of early America. Through vivid depictions of early conflicts, the French and Indian War, and Pontiac's Rebellion, all from a native perspective, *Masters of Empire* overturns our assumptions about colonial America and the origins of the Revolutionary War. By calling attention to the Great Lakes as a crucible of culture and conflict, McDonnell reimagines the landscape of American history.

The Cutting

The overwhelming majority of historical work on the late Habsburg Monarchy has focused primarily on national movements and ethnic conflicts, with the result that too little attention has been devoted to the state and ruling dynasty. This volume is the first of its kind to concentrate on attempts by the imperial government to generate a dynastic-oriented state patriotism in the multinational Habsburg Monarchy. It examines those forces in state and society which tended toward the promotion of state unity and loyalty towards the ruling house. These essays, all original contributions and written by an international group of historians, provide a critical examination of the phenomenon of "dynastic patriotism" and offer a richly nuanced treatment of the multinational empire in its final phase.
