A Manual of Dates

Language standardization is an ongoing process based on the notions of linguistic correctness and models. This manual contains thirty-six chapters that deal with the theories of linguistic norms and give a comprehensive up-to-date description and analysis of the standardization processes in the Romance languages. The first section presents the essential approaches to the concept of linguistic norm ranging from antiquity to the present, and includes individual chapters on the notion of linguistic norms and correctness in classical grammar and rhetoric, in the Prague School, in the linguistic theory of Eugenio Coseriu, in sociolinguistics as well as in pragmatics, cognitive and discourse linguistics. The second section focuses on the application of these notions with respect to the Romance languages. It examines in detail the normative grammar and the normative dictionary as the reference tools for language codification and modernization of those languages that have a long and well-established written tradition, i.e. Romanian, Italian, French, Catalan, Spanish, and Portuguese. Furthermore, the volume offers a discussion of the key issues regarding the standardization of the 'minor' Romance languages as well as Creoles.

Current Trends in Biomanufacturing focuses on cutting-edge research regarding the design, fabrication, assembly, and measurement of bio-elements into structures, devices, and systems. The field of biomaterial and biomanufacturing is growing exponentially in order to meet the increasing demands of for artificial joints, organs and bone-fixation devices. Rapid advances in the biological sciences and engineering are leading to newer and viable resources, methods and techniques that may providing better quality of life and more affordable health care services. The book covers the broad aspects of biomanufacturing, including: synthesis of biomaterials; implant coating techniques; spark plasma sintering; microwave processing; and cladding, powder metallurgy and electrospinning. The contributors illustrate the recent trends of biomanufacturing, highlighting the important aspects of biomaterial synthesis, and their use as feedstock of fabrication technologies and their characterization, along with their clinical practices. Current Trends in Biomanufacturing updates researchers and scientists the novelties and techniques of the field, as it summarises numerous aspects of biomanufacturing, including synthesis of biomaterials, fabrication of biomedical structures, their in-vivo/ in-vitro, mechanical analysis and associated ISO standards.

Hailed as an “indispensable” guide (Forbes), How to Make It in the New Music Business returns in this extensively revised and expanded edition. When How to Make It in the New Music Business hit shelves in 2016, it instantly became the go-to resource for musicians eager to make a living in a turbulent industry. Widely adopted by music schools everywhere and considered “the best how- to book of its kind” (Music Connection), it inspired thousands to stop waiting around for that “big break.” Now trusted as the leading expert for “do it yourself” artists, Ari Herstand returns with this second edition, maintaining that a stable career can be built by taking advantage of the many tools at our fingertips: conquering social media, mastering the art of merchandising, embracing authentic fan connection, and simply learning how to persevere. Comprehensively updated to include the latest online trends and developments, it offers inspiring success stories across media such as Spotify and Instagram. The result is a must- have for anyone hoping to navigate the increasingly complex yet advantageous landscape that is the modern music industry.

Managing Complexity

This book presents papers by experts in the field of Industrial Engineering, covering topics in business strategy; modelling and simulation in operations research; logistics and production; service systems; innovation and knowledge; and project management. The focus of operations and production management has evolved from product and manufacturing to the capabilities of firms and collaborative management. Nowadays, Industrial Engineering is concerned with the study of how to design, modify, control and improve the performance of complex systems. It has extended its scope to any physical landscape populated by social agents. This raises a major challenge to Industrial Engineering: managing complexity. This volume shows how experts are dealing with this challenge.

From Big Data to Big Profits

Molière and the Commonwealth of Letters

New series, new team, new missions! VITA AYALA (Morbius, Age Of X-Man), DANNY LORE (Queen Of Bad Dreams) and ERIC GAPSTUR (James Bond 007) present a fresh take on the world's greatest secret agent. When a priceless piece of art is found to be fake, investigations lead down a rabbit hole of international crime and corruption. But what the hell does James Bond know about the world of art forgery? Featuring a cover by superstar JIM CHEUNG (Justice League, Young Avengers), that will be revealed as an interlocking image over the first three issues!

Through the Bible in Felt

A memoir by the internationally famous fashion designer and style icon Mention the name "Betsey Johnson" and almost every woman from the age of 15 to 75 can rapturously recall a favorite dress or outfit; whether worn for a prom, a wedding, or just to stand out from the crowd in a colorful way. They may also know her as a renegade single mom who palled around with Edie Sedgwick, Twiggy, and The Velvet Underground, or even as a celebrity contestant on Dancing with the Stars. Betsey is also famous for her iconic pink stores (she had 65 shops across the US) and for her habit of doing cartwheels and splits down the runway at the close of her fashion shows. Throughout her decades-long career, she's taken pride in producing fun but rule-breaking clothing at an accessible price point. What they might not know is that she built an empire from scratch, and brought stretch clothing to the masses in the 80s and 90s. Betsey will take the reader behind the tutu and delve deeply into what it took to go from a white picket fence childhood in Connecticut to becoming an internationally known force in a tough, competitive business. The book will feature Betsey's candid memories of the fashion and downtown scene in the 60s and how she started her own business from the ground up after designing successfully for multiple other companies. She will discuss that

business's ups and downs and reinventions (including bankruptcy), and her thoughts on body image, love, divorce, men, motherhood, and her bout with breast cancer. Betsey will be richly illustrated with many of her landmark clothes, fashion sketches, and personal photos--making the book the perfect memento and gift for every girl (of any age) for whom Betsey is, as a recent New York Times profile noted, "a role model still."

2012 Consumer Action Handbook

This book includes designs of traditional Japanese bamboo fences, as well as diagrams illustrating the basic techniques of creating a fence including splitting, bending, joining and tying bamboo. Paired with step-by-step instructions, these designs will prove the perfect starting point for those who aspire to become a professional garden designer.

PC Mag

A highly illustrated middle-grade series that celebrates new friendships, first crushes, and getting out of your comfort zone. Ever since they can remember, fifth-graders Kenzie (aka Kenzilla) and Shelly (aka Bomb Shell) have dreamed of becoming roller derby superstars. When Austin's city league introduces a brand-new junior league, the dynamic duo celebrates! But they'll need to try out as a five-person team. Kenzie and Shelly have just one week to convince three other girls that roller derby is the coolest thing on wheels. But Kenzie starts to have second thoughts when Shelly starts acting like everyone's best friend . . . Isn't she supposed to be Kenzie's best friend? And things get really awkward when Shelly recruits Kenzie's neighbor (and secret crush!) for the team. With lots of humor and an authentic middle-grade voice, book one of this illustrated series follows Kenzie, Shelly, and the rest of the Derby Daredevils as they learn how to fall—and get back up again.

Gingival Recession Management

With vivid photography and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top of the structure that symbolize the formless world of pure knowledge and perfection.

Rantoul and Chanute Air Force Base

Dizionario della lingua italiana

Lisa was a public relations director and event planner in D.C. A Christian-in-name-only, Lisa dated freely in spite of her insecurities. An Atheist. A Catholic. A Quaker. A Preacher. A Jew. Some gave her the answers she yearned for, while others left her with more questions. As Lisa's star rose in the political movement, her quest to find her Mr. Righteous led her down a path of religious confusion and discovery. Lisa navigates her journey with humor and humility. Will she find her soul mate or save her soul? Is it too much to ask for both? "Lisa De Pasquale is one of the best conservative writers out there, but this book isn't about politics. It's a fascinating and extremely personal account of her dating life, her massive insecurities and her mostly ineffective search for God – until one man accidentally reveals the truth to her. I won't tell you how, or I'd ruin the ending. This is a true Christian story, disguised as racy 'Chick Lit.'" - Ann Coulter, New York Times Bestselling Author and Columnist "With an entirely fresh perspective and a voice that's humorous, hopeful, and, at times, absolutely heartbreaking, Lisa De Pasquale's quest to find Him is a must-read. I loved Finding Mr. Righteous, agonizing over the rough patches along with De Pasquale and cheering her on throughout, and I can't recommend this book highly enough!" - Jen Lancaster, New York Times Bestselling Author of the Tao of Martha and Here I Go Again "Finding Mr. Righteous is a true page-turner that will touch many lives. That's because it's a very sharply told, sometimes hilarious, sometimes sordid, but always bravely honest account of one woman's search -- in all the wrong places -- for connection, meaning, peace, and true love. By refusing to sugar-coat the sorrows and humiliations of her wanderings, her journey's end is all the more wonderful, powerful, moving, and sweet." - Eric Metaxas, New York Times Bestselling author of Bonhoeffer: Pastor, Martyr, Prophet, Spy

How To Make It in the New Music Business: Practical Tips on Building a Loyal Following and Making a Living as a Musician (Second Edition)

The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration of aristocratic status. The contributions to this book examine many topics which have hitherto been

neglected, such as the archaeology of the castle, which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as soldiers, administrators and potential claimants to the throne.

This everyday guide to being a smart shopper is full of helpful tips about preventing identity theft, understanding credit, filing a consumer complaint, and more. Use the margins to make notes, write questions, or record other useful information. The information and resources you'll need are arranged as follows: Part I-Be A Savvy Consumer Read this section for advice before you make a purchase. To quickly locate specific topics and information, look in the Table of Contents and Index (p. 147). Part II-Filing a Complaint Turn to this section for suggestions on resolving consumer problems. The sample complaint letter on page 57 will help you present your case. Part III-Key Information Resources Look here for a list of public resources and contact information. Part IV-Consumer Assistance Directory Here you'll find contact information for corporate offices, consumer organizations, trade groups, government agencies, and more.

Subject Index of the Modern Works Added to the Library of the British Museum in the Years 1881-1900

This textbook on elementary topology contains a detailed introduction to general topology and an introduction to algebraic topology via its most classical and elementary segment centered at the notions of fundamental group and covering space. The book is tailored for the reader who is determined to work actively. The proofs of theorems are separated from their formulations and are gathered at the end of each chapter. This makes the book look like a pure problem book and encourages the reader to think through each formulation. A reader who prefers a more traditional style can either find the proofs at the end of the chapter or skip them altogether. This style also caters to the expert who needs a handbook and

prefers formulations not overshadowed by proofs. Most of the proofs are simple and easy to discover. The book can be useful and enjoyable for readers with quite different backgrounds and interests. The text is structured in such a way that it is easy to determine what to expect from each piece and how to use it. There is core material, which makes up a relatively small part of the book. The core material is interspersed with examples, illustrative and training problems, and relevant discussions. The reader who has mastered the core material acquires a strong background in elementary topology and will feel at home in the environment of abstract mathematics. With almost no prerequisites (except real numbers), the book can serve as a text for a course on general and beginning algebraic topology.

PC World

A Manual of English Gujarati Dictionary

Computer Vision: Algorithms and Applications explores the variety of techniques commonly used to analyze and interpret images. It also describes challenging real-world applications where vision is being successfully used, both for specialized applications such as medical imaging, and for fun, consumer-level tasks such as image editing and stitching, which students can apply to their own personal photos and videos. More than just a source of “recipes,” this exceptionally authoritative and comprehensive textbook/reference also takes a scientific approach to basic vision problems, formulating physical models of the imaging process before inverting them to produce descriptions of a scene. These problems are also analyzed using statistical models and solved using rigorous engineering techniques. Topics and features: structured to support active curricula and project-oriented courses, with tips in the Introduction for using the book in a variety of customized courses; presents exercises at the end of each chapter with a heavy emphasis on testing algorithms and containing numerous suggestions for small mid-term projects; provides additional material and more detailed mathematical topics in the Appendices, which cover linear algebra, numerical techniques, and Bayesian estimation theory; suggests additional reading at the end of each chapter, including the latest research in each sub-field, in addition to a full Bibliography at the end of the book; supplies supplementary course material for students at the associated website, <http://szeliski.org/Book/>. Suitable for an upper-level undergraduate or graduate-level course in computer science or engineering, this textbook focuses on basic techniques that work under real-world conditions and encourages students to push their creative boundaries. Its design and exposition also make it eminently suitable as a unique reference to the fundamental techniques and current research literature in computer vision.

Building Bamboo Fences

Inspired by a voracious curiosity about humans and other subjects, the poems in Heather Christle’s *What Is Amazing* describe and invent worlds in an attempt to understand through participation. The book draws upon the wisdom of foolishness and the logic of glee, while simultaneously exploring the suffering inherent to embodied consciousness. Speakers play out moments of bravado and fear, love

and mortality, disappointment and desire. They socialize incorrigibly with lakes, lovers, fire, and readers, reasoning their way to unreasonable conclusions. These poems try to understand how it is that we come to recognize and differentiate objects and beings, how wholly each is attached to its name, and which space reveals them. What Is Amazing delights in fully inhabiting its varied forms and voices, singing worlds that often coincide with our own.

Subject Catalog

This book constitutes the refereed proceedings of the 6th International Conference on E-learning and Games, Edutainment 2011, held in Taipeh, Taiwan, in September 2011. The 42 full papers were carefully reviewed and selected from 130 submissions. The papers are organized in topical sections on: augmented and mixed reality in education; effectiveness of virtual reality for education; ubiquitous games and ubiquitous technology & learning; future classroom; e-reader and multi-touch; learning performance and achievement; learning by playing; game design and development; game-based learning/training; interactions in games; digital museum and technology, and behavior in games; educational robots and toys; e-learning platforms and tools; game engine/rendering/animations; game-assisted language learning; learning with robots and robotics education; e-portfolio and ICT-enhanced learning; game-based testing and assessment; trend, development and learning process of educational mini games; VR and edutainment.

Wingfield College and Its Patrons

This book is designed to serve as a clear and concise clinical manual that covers all aspects of the current management of gingival recession, with a particular focus on surgical techniques with the adjunctive use of autogenous tissues or soft tissue substitutes for recession coverage. A structured overview of the various surgical techniques is provided with the aid of high-quality illustrations, delivering an evidence-based clinical treatment guideline. In addition, individual chapters are dedicated to the classification of gingival recession, etiology and prevalence, clinical examination and diagnosis, decision making, potential complications, and postsurgical care. Gingival recession is a common condition in the adult population and is related to several undesirable conditions such as unaesthetic appearance, root caries, and hypersensitivity. Periodontal plastic surgery is now an important tool in the armamentarium of the clinician treating gingival recessions, and practitioners at all levels will find this book to be an invaluable source of guidance.

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

Mondiale waardeketens zijn het complexe netwerk van activiteiten tussen lokale producent en eindgebruiker. "Global value chains" schetst de invloed van deze waardeketens op lokaal, nationaal en internationaal niveau. Het boek geeft eerst een theoretisch en wetenschappelijk kader. Vervolgens krijgt de lezer een compleet beeld van de betekenis van mondiale waardeketens aan de hand van diverse casestudies, zoals de bierbrouwindustrie in Ghana, de Namibische bio-industrie, de industrie van halfgeleiders in China en Maleisië en het toerisme in Tanzania.

PC Magazine

Technological advancements in computing have changed how data is leveraged by businesses to develop, grow, and innovate. In recent years, leading analytical companies have begun to realize the value in their vast holdings of customer data and have found ways to leverage this untapped potential. Now, more firms are following suit and looking to monetize Big Data for big profits. Such changes will have implications for both businesses and consumers in the coming years. In *From Big Data to Big Profits*, Russell Walker investigates the use of Big Data to stimulate innovations in operational effectiveness and business growth. Walker examines the nature of Big Data and how businesses can use it to create new monetization opportunities. Using case studies of Apple, Netflix, Google, LinkedIn, Zillow, Amazon, and other leaders in the use of Big Data, Walker explores how digital platforms such as mobile apps and social networks are changing the nature of customer interactions and the way Big Data is created and used by companies. Such changes, as Walker points out, will require careful consideration of legal and unspoken business practices as they affect consumer privacy. Companies looking to develop a Big Data strategy will find great value in the SIGMA framework, which he has developed to assess companies for Big Data readiness and provide direction on the steps necessary to get the most from Big Data. Rigorous and meticulous, *From Big Data to Big Profits* is a valuable resource for students, researchers, and professionals with an interest in Big Data, digital platforms, and analytics
