AI can already identify malignant tumors on CT scans, give legal advice, out-bluff the best poker players in the world, and, with ever-increasing skill, drive our cars. In *Who's Afraid of AI?*, award-winning author Thomas Ramage expertly explains how machines are learning to learn, and he questions what today's explosion of AI capability could mean for tomorrow: Is it ethical to allow robots—endlessly patient—to replace human caregivers in providing comfort and companionship to the elderly? Since AI feeds on big data, can we prevent its misuse by corporations or the government? Will AI ever be capable of runaway self-improvement? And if “the singularity” does arrive, with AI's intelligence exponentially outpacing our own, what will become of us when, in many ways, we're obsolete?

The initial enthusiasm of many EU citizens at the 'return to Europe' of former members of the Soviet bloc has turned to anxiety at the realization of the possible adverse consequences of enlargement. Potential undesirable effects of enlargement, in particular for labour markets and social conditions, can be met by appropriately designed policies which are so far not in place or planned. Rather than legitimizing such fears, politicians and policy-makers must dispel them by leading the EU and its members to adopt these measures. Enlargement also offers the EU a window of opportunity to accelerate unavoidable

I May Be Wrong But I Doubt It

The secrets behind China's extraordinary educational system—good, bad, and ugly Chinese students' consistently stunning performance on the international PISA exams—where they outscore students of all other nations in math, reading, and science—have positioned China as a world education leader. American educators and pundits have declared this a "Sputnik Moment," saying that we must learn from China's education system in order to maintain our status as an education leader and global superpower. Indeed, many of the reforms taking hold in United States schools, such as a greater emphasis on standardized testing and the increasing importance of core subjects like reading and math, echo the Chinese system. We're following in China's footsteps—but is this the direction we should take? *Who's Afraid of the Big Bad Dragon?* by award-winning writer Yong Zhao offers an entertaining, provocative insider's account of the Chinese school system, revealing the secrets that make it both "the best and worst" in the world. Born and raised in China's Sichuan province and a teacher in China for many years, Zhao has a unique perspective on Chinese culture and education. He explains in vivid detail how China turns out the world's highest-achieving students in reading, math, and science—yet by all accounts Chinese educators,

The philosophies of French thinkers Derrida, Lyotard, and Foucault form the basis for postmodern thought and are seemingly at odds with the Christian faith. However, James K. A. Smith claims that their ideas have been misinterpreted and actually have a deep affinity with central Christian claims. Each chapter opens with an illustration from a recent movie and concludes with a case study considering recent developments in the church that have attempted to respond to the postmodern condition, such as the "emerging church" movement. These case studies provide a concrete picture of how postmodern ideas can influence the way Christians think and worship. This significant book, winner of a Christianity Today 2007 Book Award, avoids philosophical jargon and offers fuller explanation where needed. It is the first book in the Church and Postmodern Culture series, which provides practical applications for Christians

Brer Rabbit. Uncle Remus. Song of the South. Racist? Disney thinks so. And that's why it has forbidden the theatrical re-release of its classic film Song of the South since 1986. But is the film racist? Are its themes, its characters, even its music so abominable that Disney has done us a favor by burying the movie in its infamous Vault, where the Company claims it will remain for all time? Disney historian Jim Korkis does not think so. In his newest book, *Who's Afraid of the Song of the South?*, Korkis examines the film from concept to controversy, and reveals the politics that nearly scuttled the project. Through interviews with many of the artists and animators who created Song of the South, and through his own extensive research, Korkis delivers both the definitive behind-the-scenes history of the film and a balanced analysis of its cultural impact. What else would Disney prefer you did not know? Plenty. Korkis also pulls back the curtain on such dubious chapters in Disney history as: Disney's cinematic attack on venereal disease Ward Kimball's obsession with UFOs Tim Burton's depressed stint at the Disney Studios Walt Disney's nightmares about his stomping an owl to death Wally Wood's Disneyland Memorial Orgy poster J. Edgar Hoover's hefty FBI file on Walt Disney Little Black Sunflower's animated extinction Plus 10 more forbidden tales that Disney wishes would go away. With a foreword by Disney Legend Floyd Norman, *Who's Afraid of the Song of the South?* is both authoritative and entertaining. Jim Korkis is the
