The Quintessential Wizard

"The story of one of the most prolific, independent, and iconoclastic inventors of this century . . . fascinating."--Scientific American
Nikola Tesla (1856-1943), credited as the inspiration for radio, robots, and even radar, has been called the patron saint of modern electricity. Based on original material and previously unavailable documents, this acclaimed book is the definitive biography of the man considered by many to be the founding father of modern electrical technology. Among Tesla's creations were the channeling of alternating current, fluorescent and neon lighting, wireless telegraphy, and the giant turbines that harnessed the power of Niagara Falls. This essential biography is illustrated with sixteen pages of photographs, including the July 20, 1931, Time magazine cover for an issue celebrating the inventor's career. "A deep and comprehensive biography of a great engineer of early electrical science--likely to become the definitive biography. Highly recommended."--American Association for the Advancement of Science
"Seifer's vivid, revelatory, exhaustively researched biography rescues pioneer inventor Nikola Tesla from cult status and restores him to his rightful place as a principal architect of the modern age." --Publishers Weekly
Starred Review "[Wizard] brings the many complex facets of [Tesla's] personal and technical life together in to a cohesive whole. I highly recommend this biography of a great technologist." --A.A. Mullin, U.S. Army Space and Strategic Defense Command, COMPUTING REVIEWS
"[Along with A Beautiful Mind] one of the five best biographies written on the brilliantly disturbed."--WALL STREET JOURNAL
"Wizard is a compelling tale presenting a teeming, vivid world of science, technology, culture and human lives."--NEW SCIENTIST
"Marc Seifer is an

excellent writer and scholar, who has produced a wonderfully readable and illuminating biography of one of the most intriguing men of this century mak[ing] us understand not only the man, but also the times in which he lived. [A] masterpiece.”--NELSON DEMILLE “The author presents much new material [and] bases his book on a large number of archival and primary sources. Underneath the layers of hero worship, the core of Seifer's book is a serious piece of scholarship.” --Ronald Kline, SCIENTIFIC AMERICAN “Seifer has done a remarkable job going through all the Tesla manuscripts ferret[ing] out hundreds of newspaper and magazine articles in which he traces out Tesla's public image [and] offers a reasonable reconstruction of Tesla's emotional world. Seifer has significantly advanced our understanding of Tesla.”--Bernard Carlson, author of Tesla: Inventor of the Electrical Age, for ISIS “It is my opinion that Dr. Seifer leads the world as the most authoritative of all the Tesla researchers.”--J.W. McGINNIS, President, International Tesla Society “Far and away the best job among Tesla biographies.”--Jeffrey D. Kooistra, INFINITE ENERGY “Wizard is utterly absorbing with chapters charting all stages of Tesla's life. Seifer treats his prodigious subject with sympathy and realism.”--NEXUS “Wizard presents a much more accurate picture of Tesla. [It] is thorough, informative, entertaining and a valuable addition to electro-technological history, past and future.”--ELECTRONIC ENGINEERING TIMES “In modern times, Tesla may be enjoying a comeback thanks to books like Wizard.”--THE NEW YORK TIMES

Book Three of the Magic Kingdom of Landover Series It all began when the half-able wizard Questor Thews announced that finally he could restore the Court Scribe Abernathy to human form. It was his spell that had turned Abernathy into a Wheaten Terrier—though with hands and able to talk. All went well—until the wizard breathed the magic dust of his spell and suddenly sneezed. Then, where Abernathy had stood, there was only a bottle containing a particularly evil imp. It had been in the collection of Michael Ard Rhi, former King of Landover, now exiled to Earth. Abernathy must now be a part of that collection! High Lord Ben Holiday set forth for Earth, taking his green but beautiful love, Willow, with him. Unfortunately, they were long in returning. And without the soil in which to root as a tree at times, Willow could not long survive. That left it up to Questor Thews to save them. Grimly he set out to seek help, knowing himself to be incompetent. And to make things worse, the imp had escaped and sought the help of the evil witch Nightshade, now back from exile in Faerie. Questor's only idea seemed impossible, but . . .

The Publishers Weekly

Once upon a time, at two-thirty in the afternoon, on the enchanted island of York, lived a Wizard. Wearing a big hat to mask his identity, Cheech Wizard is a lascivious con man whose magical powers are questionable -- but despite his transgressions (or perhaps because of them), he possesses some degree of cosmic insight. He has met his maker (legendary underground cartoonist Vaughn Bodé, making a divine cartoon cameo), died and been reborn, and gained pop-culture immortality as a worldwide icon of hip hop and street art. For the first time, the Book of Me gathers all of Vaughn Bodé's seminal Cheech Wizard comics into a single essential volume, along with rare and previously unpublished sketches and Cheech's outrageous continued adventures by Mark Bodé. It's the biggest, baddest, ball-bustingest Book of Cheech ever!

In his hunger for power and knowledge, he tampered with long-held secrets and loosed a terrible shadow upon the world. The Wizard's Guardian: Book Three of the Guardian Trilogy

A comprehensive bibliography of books and short fiction published in the English language.

Isaac Asimov's Science Fiction Magazine

From the best-selling, award-winning author of *1491* and *1493*--an incisive portrait of the two little-known twentieth-century scientists, Norman Borlaug and William Vogt, whose diametrically opposed views shaped our ideas about the environment, laying the groundwork for how people in the twenty-first century will choose to live in tomorrow's world. In forty years, Earth's population will reach ten billion. Can our world support that? What kind of world will it be? Those answering these questions generally fall into two deeply divided groups--Wizards and Prophets, as Charles Mann calls them in this balanced, authoritative, nonpolemical new book. The Prophets, he explains, follow William Vogt, a founding environmentalist who believed that in using more than our planet has to give, our prosperity will lead us to ruin. *Cut back!* was his mantra. Otherwise everyone will lose! The Wizards are the heirs of Norman Borlaug, whose research, in effect, wrangled the world in service to our species to produce modern high-yield crops that then saved millions from starvation. *Innovate!* was Borlaug's cry. Only in that way can everyone win! Mann delves into these diverging viewpoints to assess the four great challenges humanity faces--food, water, energy, climate change--grounding each in historical context and weighing the options for the future. With our civilization on the line, the author's insightful analysis is an essential addition to the urgent conversation about how our children will fare on an increasingly crowded Earth.

An introduction to the pioneering ideas of a leading contributor to modern electrical engineering includes coverage of such topics as his rivalry with Thomas Edison, his innovations in the field of alternating current and his history-changing role in the development of such inventions as remote controls, fluorescent lights and cell phones.

The film’s producer believes he’s the target of a sinister curse—but it’s the women around him who are dying, in increasingly spectacular ways. Harry’s doubly frustrated because he only got involved with this bizarre mystery as a favor to Thomas—his flirtatious, self-absorbed vampire acquaintance of dubious integrity. Thomas has a personal stake in the case Harry can’t quite figure out, until his investigation leads him straight to the vampire’s oversexed, bite-happy family. This is a time of desperation for the good races because Darius has been lost to lower Neoluzia due to the Gathering of Replenishment spell cast upon him by members of the secretive wizard guild, the Veiled Institution. David Parr, a human from Earth summoned by Darius that reluctantly remains in Neoluzia to assist the Salon of Enlightenment against their Orc enemies, must find the great necromancer Termaplix if the land is to be saved. Finding Termaplix may be impossible however, for the hero from the War of Cleansing has been hidden in a secret place due to unknown circumstances one thousand years ago--a tomb long since forgotten to the current

generations in the land. Perilously stifled in their shift away from the old magic and the forced elimination of history, those that Parr seeks to help against the enemy from the north must first learn to embrace the gift of magic again, an art banished in antiquity by the deception of peace and the deep wounds of the surviving populations in the first war.
